

3DDispense

• Liquid Handling for Life

- "It is the responsibility of those of us involved in today's biomedical research enterprise to translate the remarkable scientific innovations we are witnessing into health gains for the nation. At no other time has the need for a robust, bidirectional information flow between basic and translational scientists been so necessary." - Elias Zerhouni

Hello Fellow Innovators,

Bring your thinking caps - we're gonna want your help on this one! How can our **3Dispense Non-contact NanoLiter Dispensing Syringe Pump** fit with your custom requirements?

Dispense Droplets Ranging From <10nL to Full Syringe Volumes in a Single Dispense

Why dispense microLiters when you can be dispensing nanoLiters? With our **3Dispense Non-Contact Dispensing Syringe Pump**, you can dispense droplets ranging from <10nL to full syringe volumes in a single dispense. The **Syringe Pump** style footprint with remote active dispense tip can be used as a stand alone, handheld, or integrated into liquid handling platforms and instrumentation. It eliminates the need for dilutions and is live cell friendly. With programmable function buttons--prime, aspirate, dispense, purge; and also adjustable dispense parameters of velocity, volume, and number of dispenses per cycles--our **3Dispense Non-Contact Dispensing Syringe Pump** can dispense up to 1,000 dispenses per second.
