

# ***FUSION SOLUTIONS***

Fusion Epic Orange Advanced Adhesive Remover is the adhesive remover for our industry. Fusion Tools has developed this adhesive remover specifically for the materials and adhesives used on window films, paint protection films & vinyls. Simply spray to the desired area and watch Fusion Epic Orange break down the adhesive for a fast easy removal! Don't need the products maximum strength? Dilute the formula by adding water. All of our bottles come with sealed caps to prevent leakage during shipping. Our formula has no alcohol, no ammonia and no formaldehyde. Our formula also has no oils to avoid complications when reinstalling new materials after using Fusion Epic Orange.

# ***FUSION SOLUTIONS***

Fusion All Type- Ultra Clear Mounting Solution is more than just a mounting solution, it is the solution the industry has been seeking. Fusion All Type is an all in one mounting solution designed for use on all types of adhesive and materials. Fusion All Type can be used as a prepping cleaner and mounting solution. It is safe for use on window films, vinyl & paint protection films. With our conservative mixing ratios, the end user will save money verses other brands and soaps currently used today.

Fusion All Type is biodegradable & has no unnessecary ingredients to ensure the purest product available. Our formula is filtered five times in massive filtration systems before being heat sealed to avoid leaking during shipping. Our 1 gallon bottles are even packed in individual U.N. approved boxes.

# ***FUSION MAX FLUX HEAT GUN***

THE FUSION MAX FLUX HEAT GUN is the first heat gun specifically designed for OUR INDUSTRY!

The inventor of all the Fusion Tools you know and love is happy to present the perfect heat gun for all of your post heating & shrinking needs. The Max Flux Heat Gun offers a style that fits perfectly in the nook of your arm for precision handling. The 26 CFM gives you the ability to spread the heat exactly where you need it. With an adjustable heat gauge from 750° - 1000° (Fahrenheit), the Max Flux takes away any question of which heat gun is right for our installs. The Max Flux Heat Gun includes a full roll of Fusion Afterburn Tape in the box & pre installed! Register your purchase with the manufacturer fast & easy online. After the 2 year warranty, if you're ready for a new heat gun, don't waste money on purchasing an entirely new unit. The Max Flux Heat Gun has a **REPLACEABLE HEATING ELEMENT FOR LESS THAN HALF THE COST OF A NEW GUN!** Simply unscrew the barrel and plug in a new ceramic heating core.

\*Max Flux Heat Gun currently available for 110v (North American plug Type A only).  
Stay in touch @fusiontools on social media while we work on producing a 220v model!

# ***FUSION CHANNEL STROKE SQUEEGEES***

The Fusion Channel Stroke Squeegees are designed to fit perfectly into other squeegee handles in the industry. We heard the cry for a softer stroke blade so we made our Fusion Orange Channel Stroke Squeegee at 85 durometer and an improved Fusion Blue Channel Stroke Squeegee at 94 durometer. Once again, there's no sacrifice of quality with our squeegees. You can rest assured you're only purchasing high quality, Made in the USA products when you see our ***FUSION*** logo stamped prominently across our products.

SOFC2017

SBFC2017

# FUSION CHANNEL SQUEEGEES

The Fusion Channel Squeegees are available in 2 colors, 2 durometers & 6 length options. The Blue Channel Squeegee is 94 durometer. The Orange Channel Squeegee is 85 durometer. The squeegees are designed to go into common window/ shower squeegees. With our Fusion Channel Squeegees there is no more hoping you are getting a quality replacement blade. We ensure you only get the highest quality materials available to the industry and stamp our logo across the channel proudly.

# ***FUSION FIDGET TOUCH UP TOOLS***

The Fusion Fidget 3 Pack (White, Pink & Blue) provides three small slip infused touch up cards designed to offer any level of flexibility needed to touch up specs and flaws in window films, paint protection films, and vinyl applications. The Fusion Fidget 3 Pack comes with a stiff white card, a medium pink card, & soft blue card. All three cards feature 3 round corners & a squared corner for user choice. The blue & pink cards are designed to be softer than the hard coatings on some films to ensure the tool wears down before the film does.

F3P2017

# ***FUSION HARD CARDS***

Hard cards are the staple tool for film and vinyl installation.

The Fusion Hard Cards come in two different shapes and 7 different colors. The colors are, from most flexible to least flexible, Blue, Pink, Silver, Black, Red, White, and Gold. All of our Hard Cards are infused with slip agents to help them glide across their working surfaces. Just like our Fusion Fidgets, our Blue and Pink Hard cards are designed to be softer than the hard coating on most window films so that the tool will wear instead of the film.

# ***FUSION HARD CARDS***

# ***FUSION EXTRACTOR BLADES***

The Fusion Red Line Extractor Blades come in 2 thicknesses. The first option is our 95 durometer 1/4" thick option. This is the same thickness as our classic Orange Crush and other squeegees. The Red Line blades have been dubbed "Extractors" due to their fantastic liquid removal abilities. The 1/4" thick options are available with or without bevel options along the working edge of the blade.

With our new design, your blade lasts longer.

# ***FUSION EXTRACTOR BLADES***

Another version of our 1/4" Thick Blades are our 95 durometer option with NO Bevels. This will give the user a total of 4 working edges over the course of the tools life. The squared off cube design of these squeegee blades also gives the user maximum pressure against the job at hand by resisting flex under extreme force. When paired with our Fusion Handles, installers are sure to knock out the job quickly and efficiently.

# ***FUSION EXTRACTOR BLADES***

Our 3/8" thick Red Line Extractors are our hardest blade. Again these blades feature a cubed, NO Bevel design. Thicker than any other squeegees we've ever designed, these monster blades will not leave behind any liquid to speak of. The 3/8" Thick blade is by far the most rigid option for the installer. The 90 Durometer is slightly softer without losing firmness.

Made to accompany our NEW Fusion Big Mouth Handles!

# ***FUSION SQUEEGEE BLADES***

The Hybrid Squeegee Blade is an industry revolution. We released the Hybrid on January 5th, 2016 via our Facebook page. The Hybrid is exactly what it's name suggests; a Hybrid of 2 industry favorite squeegee blades. On one side the Hybrid is an Orange 85 durometer squeegee blade and on the other side a harder Blue 95 durometer. This dual blade features double beveled working edges. Simply flip the blade in your Fusion Handle to use one side or another. The Hybrid is available in 8" and 5" rectangle versions.

# ***FUSION SQUEEGEE BLADES***

The Orange Crush is our original squeegee blade. When the Orange Crush was originally made technology hadn't advanced to the point we needed it to be yet but we still sought out a better solution than what was available at that time. We traveled the U.S. looking and finally found it. After building an injection mold for 8", 5", and 5" cropped lengths, we began production. Since it's creation we have continued to better the formula for the Orange Crush. Some of the changes implemented are advances in technology and include 3 slip additives with migratory agents and color stability for consistency.

# ***FUSION SQUEEGEE BLADES***

The Clear Crush is a squeegee blade designed for users that prefer the flexibility of a soft squeegee but the stiffness of harder squeegee. This blade is the best of both worlds. Soft enough to squeegee curved surfaces without having to apply too much pressure but stiff enough to push or pull solution away from the job at hand. The Clear Crush has become a user favorite for rear window automotive installation and decorative film flat glass installation. It is available in 5" rectangle and 5" Cropped versions.

# ***FUSION SQUEEGEE BLADES***

The PPF Black Out is a squeegee blade designed specifically for paint protection film installs, but has also become a favorite in the automotive window film industry.

The PPF Black Out features a high content of slip additives to help the tool slide easily across paint protection films. At 88 durometer it is flexible enough to conform to odd surfaces. We recommend pairing this blade with a magnetic Fusion Hand Job or Fusion Hand Dee to help the installer hold their paint protection film in place before installing.

# ***FUSION SQUEEGEE BLADES***

The Pink Clean is our softest squeegee blade specifically designed to be extremely flexible to easily conform to curved surfaces while squeegeeing the working area with less force applied by the user.

This blade is injection molded with 3 slip additives to help the tool slide across the working surfaces easier. As the tool wears the slip additives migrate toward the surface to increase the life of the tool. All of our squeegee blades are made with exclusive patented materials and processes. We recommend this blade for cleaning and squeegeeing purposes.

# ***FUSION SQUEEGEE BLADE HANDLES***

The Fusion Hand Job hit the industry with it's bold name at the WFCT in San Antonio, Texas in 2016. We engineered the Fusion Hand Job while installing window film in a tight spot. We couldn't fit any of our larger handles into the area and so, The Fusion Hand Job was born. After it's release in 2016, we modified the original design to feature 2 magnets and an alternate name; The Fusion Hand Dee. This tools name plate is interchangeable for custom orders. Ask about different options to hear more.

# ***FUSION PADDLE SQUEEGEES***

The PPF Hornet is an innovation we are extremely proud of. The concept carried over from our first dual durometer squeegee blade, The Hybrid, and has now been adapted for the paint protection film installer. With technology advancing in paint protection films, the demand for soft squeegees rose. We saw the need in the industry and decided to take action. Based on user feedback and personal experience while installing paint protection film, we decided to make the Hornet “paddle” style meaning that it’s thin in design can be easily flipped in-hand. The newest versions now feature removable labels for the cleanest install possible.

## ***FUSION TURBO PROS***

The Fusion Turbo Pros are the first triangular shaped squeegees to be injection molded in the industry. This ensures, consistency that past brands have not been able to provide. By injection molding our parts we can ensure accurate density per part. Our Fusion Turbo Pros are infused with 3 slip additives. One of those slip additives is migratory, meaning that it moves throughout the tool as you're using it. We have worked to perfect our formulas for each durometer of Fusion Turbo Pro. Each Turbo Pro is available in pre molded sizes of 3.5 inch, 5.5 inch, & 8 inch lengths. The 3.5 inch and 5.5 inch lengths are molded with 45 degree angled sides and is designed to be used "out-of-the-box", but they can be trimmed to user preferences. The 8 inch length has 90 degree sides. While the 8 inch length can be used in its entirety; it has been designed to be cut to the users desired length and shape.

We also offer a 1 inch diameter white extruded PVC handle that fits very closely to the Fusion Turbo Pros or a 2 inch diameter gray extruded PVC handle that is designed to fit in-hand more. We recommend the 1 inch white for handling with finger tips and the 2 inch gray for handling with the entire palm of the installer. Our handles are specifically made to fit our Fusion Turbo Pros.

# ***FUSION TURBO PROS***

The Fusion Turbo Pros are available in 3 different sizes with or without 2 different handle options in 6 colors that coincide with their different level of durometer. Below is a chart that briefly explains each color and durometer.

PINK	GREEN	BLACK	YELLOW	ORANGE	RED
Super soft. Extremely flexible. Designed for self healing PPF installation & cleaning.	Comparable to the current industry green turbo. Recommended for PPF (self healing and other) & films with soft hard coatings.	Comparable to the current industry black turbo but will not leave marks. Recommended for PPF, & soft hard coatings. Cleaning and prep.	Comparable to the current industry yellow but will stay consistent in durometer. Recommended for auto installation, PPF and Vinyl.	Slightly stiffer than yellow. Recommended for small installation areas, most window films, vinyl and PPF applications.	Super hard. Comparable to the current industry red turbo. Commonly used for vinyl application & window films.
