Roadmap to Safety

Farm Packages

Commercial Packages

C-Series Sidewall Stairs

The C-Series Sidewall Stairs are currently offered for Commercial (CC) and Farm (CF) Applications

- *The C-Series Commercial (CC) Sidewall Stairs were designed to offer compliance when egress standards are not expected*
- *The CC packages offer a 24 inch walkway and an inside and outside railing with a guardrail on the exposed side and provides 9 inches of clearance from the bin wall for stiffeners and wind rings*
- *The C-Series is capable of fitting bins 18 ft in diameter to 156 ft in diameter*
- *Platforms can be placed at any elevation as any normal step (Contact us to quote your custom elevation)*
- *Two lengths of trapezoid platforms help to eliminate gaps between platform and top step*
- *CF modules do not include an inside railing or guard rail on the exposed side*
- *CC packages include double eave platforms 4.4" above eave and 12" below inspection portal, a self closing gate, as well as rest landings every 6 wide rings*
- *CF packages do not include a gate or rest landings and have one platform 4.4" below eave*
- *5 different sizes: 44", 42" (Chief), 42" with 2.66" Corrugation, 39", & 32"*

CC Double Eave Platform

Both are long platforms

CF Single Platform

Long platform

C-Series Sidewall Stairs

The individual units are listed below, replace the 44 with the ring height as seen on the following pages.
 Example: CC3544L is the first line item when ordered for a 44" wide corrugation bin. For a 42" with 2.66" corrugation, order CC3546L.

"CC" Commercial Modules

Item	Description	List Price	Weight	Horizontal Travel	9 3/8 Bolt Spaces
CC3544L	C-Series Long Stair Platform, includes ASG100	\$1315.00	191 lbs	37 1/2"	4

ES3600 Series Intermediate
Platform Package

Ordering Information:

- Easy Step stairs feature a 24" wide step that sits 7" from the bin wall.
- Easy Step sidewall stairs fit bins from 24' to 75' in diameter
- For adjacent bins sharing one platform, space bin walls 38" apart, if using a twin platform space 64" apart
- For larger spans refer to page 7 for the use of the Easy Step Filler Platform, ES3748
- Easy Step Platform sits 12" below the eave
- To calculate parts needed, order 1 Stair Platform with Stair Assembly (ES35xx) for the top ring of your bin, and 1 Stair Section for each remaining ring (ESxx00)
- To use an Intermediate Platform, substitute an Intermediate Platform and Stair Assembly for 1 Stair Section (ES36xx).
- Does not meet OSHA regulation 1910.25(C)(3)
- Example: On an 8-ring 44" sheet bin with an Intermediate Platform, use 1-ES3544, 1-ES3644, and 6-ES4400

CC3748 Crossover Platform

- Allows for the joining of two bins by connecting two platforms to form a bridge
- Bridge is 46" wide with integrated kickboards providing a 44" walkway
- Can facilitate ascending or descending stair access or additional platforms on either bin
- Can be used on C-Series or Easy Step Sidewall Stair Platforms
- C-Series maximum bin wall to bin wall clearance is 8'10"
- Easy Step maximum bin wall to bin wall clearance is 8'6"
- See pg. 5 for pricing information

Original Sidewall Stairs

NON STOCKING ITEM • EXPECT 12 WEEK LEAD TIME

14400 Stair Section

38000 Ladder Platform, 38050 Platform Filler, 35000 Stair Platform

Ordering Information:

- *Original Sidewall Stairs feature a 20" wide step that sits 6" from the bin wall.*
- *Original Sidewall Stair packages fit bins from 18' to 105' diameter and are not for commercial use.*
- *For adjacent bins sharing one platform, space bin walls 32" apart, and 54" if using a twin platform.*
- *On a standard bin, the stair sections used are determined by the height of the sheet. For a 32" bin sheet, use one 13200 per sheet. For the top two rings, the parts needed are determined by the desired location of the platform, using the chart below.*

TOP TWO RINGS

Height of rings	5 ½" below eave	16" below eave
44"	1-35000 Platform 1-13200 Section 1-14400 Section	1-35000 Platform 1-12100 Section 1-14400 Section
32"	1-35000 Platform 1-12100 Section 1-13200 Section	1-35000 Platform 1-14400 Section

Example: For an 8-ring bin with 32" sheets and a platform 16" below eave, use 1-35000 Platform, 1-14400 Stair Section, and 6-13200 Stair Sections.

AVT46091	A-Series, 4'x6' Landing, 9 Step Straight Up Stair Section	\$4,105.00	629

Easy Step Roof Ladder Handrail

Illustration depicts an ES61100,
ES61233, and 51450.

Items are sold individually.

ES60118, for bin diameter packages,
see page 27

Ordering Information: *Easy Step Roof Ladder Handrail sections bolt to the ladder rungs attached on the bin roof between roof ribs. They come in two rung and three rung space lengths.*

The Roof Ladder Handrail packages are configured for use with the ES61100 or ES51100 peak package. If you are not using a peak safety package, order the next size larger Roof Ladder Handrail package. The ES61500 Top Post Package is included in all Easy Step Roof Ladder Handrail bin packages.

Easy Step Peak Handrail

Ordering Information: If using Easy Step Roof Stairs or Easy Step Roof Ladder Handrail with your peak handrail:

ES60700: go up 1 size from bin diameter

ES60900 & ES61100: use bin diameter

ES61300: go down 1 size from bin diameter

Item	Description	Inside Diameter	Outside Diameter	List Price	Weight
ES60700	Easy Step 7 Section Peak Handrail	81"	7'	\$937.00	110lbs
ES60900	Easy Step 9 Section Peak Handrail	105"	9'	\$1,207.00	142lbs
ES61100	Easy Step 10 Section Peak Handrail	117"	10'	\$1,328.00	155lbs
ES61300	Easy Step 13 Section Peak Handrail	153"	13'	\$1,670.00	195lbs
ES60100	Easy Step Single Section (adds 1' diameter to package)		+1' OD	\$135.00	16lbs
ES60001	Additional Easy Step Peak Handrail Entry Post Package			\$189.00	22lbs

Easy Step Walkaround

Illustration depicts an ES51100 Walkaround, ES51124 Roof Stair, 51450 Manhole Guardrail, and ESLA01 Ladder Access.

Items are sold individually.

Ordering Information: If using Easy Step Roof Stairs or Easy Step Roof Ladder Handrail with your peak walkaround:

ES50700: go up 1 size from bin diameter

ES50900 & ES51100: use bin diameter

ES51400 & ES51600: go down 1 size from bin diameter.

To determine the minimum walkaround size to allow space for the fill lid:

- Ensure the **OUTSIDE DIAMETER** is at least 3 times greater than the fill hole diameter
- Ensure the **INSIDE DIAMETER** is at least 3" greater than the fill lid

Item	Description	List Price	Weight	Inside Diameter	Outside Diameter
ES50700	Easy Step 7' Walkaround	\$2,137.00	225 lbs	38 7/8"	87"

A-Series Roof Deck

- The A-Series Roof Deck is designed with simplified installation in mind and allows for stair transitions that are compliant with applicable standards for safety and reliability.
- Each section is equivalent to 1' of the outside deck diameter. Example: 48' outside diameter deck is 48 Sections of ARD2480.
- Available in 3 different sizes, ranging from 12' diameter up to a straight line deck, such as on a building roof.
- Designed for roof slopes from 30° to 40°.
- Arrest landings can be configured as required by local and regional safety standards to allow for rest landings in the run.
- Another benefit of the rest landings is the ability to change roof stair approach from the eave platform. An eave platform may be at 6 o'clock, but the best approach to the peak may be at 9 o'clock. The lower stair can approach the mid roof deck at 6 o'clock, walk around the deck to 9 o'clock, and proceed up the stairs to the peak of the bin.

Item	Description	List Price	Weight
ARD1236	A-Series Roof Deck 12-36' Diameter	\$371.00	75lbs

ASG100	A-Series Self Closing Gate, Galvanized	\$335.00	38lbs	

Perimeter Safety Rail

- *Guard Rail for Eave Perimeter that mounts to the bin wall*
- *Can attach to every stiffener on a 3 stiffened tank, and every other on a 2 stiffened tank*
- *On a 3 stiffened bin can be retrofitted without bin entry*
- *Available in 2 sizes; standard bolt spacing or Chief and Behlen bolt spacing*
- *Toe kick allows roof trash to wash away*
- *1 1/2" round handrail with formed ends make for a secure and stable grip*

Ordering Information: *Order 3 PSR sections for each wall panel (bin sheet).*

Item	Description	List Price	Weight
PSR3750	Perimeter Safety Rail, single section 37.5"	\$ 215.00	22
PSR4239	Perimeter Safety Rail, single section, Chief or Behlen	\$ 215.00	22

MRH Roof Handrail

US Patent 8,595,990

How to Calculate Parts Needed for Mid-Roof Handrail:

Number of Sections: One Mid-Roof Handrail section (MRH001) for each foot of desired diameter.

Number of Roof Mounts: One Roof Mount (MRV_1) for each roof panel covered by the Mid-Roof Handrail. The minimum number of mounts needed is 1 per section of MRH001.

Number of Entries: One entry section (MRHE01) for each instance that you need to pass through the Mid-Roof Handrail.

24" of roof run must be allowed outside of the handrail to allow for mounting hardware, and 36" off of the diameter.

Example: If the handrail will be placed halfway down the roof of a 60' diameter bin, the handrail diameter (inside diameter) will be 30', you order Quantity 30 MRH001. If there are 60 roof panels at the Mid-Roof Handrail roof location, order Quantity 60 MRV_1. Indicate the bin manufacturer when ordering because the mounts are brand specific to correspond to the pre-punched roof rib holes. Typically, at least 1 entry section will be required for each system.

Please call for assistance with any configuration questions.

Item	Description	List Price	Weight
MRH001	Mid Roof Handrail	\$204.00	32 lbs
MRHE01	MRH Entry Section	\$394.00	56 lbs
MRVB1	Behlen Mount Foot	\$11.00	3 lbs
MRVC1	Chief Mount Foot	\$11.00	2 lbs
MRVS1	Sukup Mount Foot	\$11.00	3 lbs
MRVX1	Sioux Steel Mount Foot	\$11.00	3 lbs
MRVK1	Brock Mount Foot	\$11.00	3 lbs
MRVT1	Twister Mount Foot	\$11.00	3 lbs

A-Series Sidewall Deck (Eave Walkaround)

US Patent: 8,595,989

Drawing illustrates a 3 stiffened 132' bin with the skip a stiffener deck.

- The Sidewall Deck is available as a walkway option around the sidewall of an externally stiffened bin. It is attached by field drilling through the face of the stiffeners and attaching AWD001 mounting brackets.
- Bins with two stiffeners per sidewall panel require one mount and one deck section per stiffener.
- Bins with three stiffeners per sidewall panel below 30' in diameter require one mount and one deck section per stiffener. Three stiffened bins above 30' may utilize the skip a stiffener configuration where one mount and one deck are used for every other stiffener.
- The Sidewall Deck is load rated for 900 lbs.
- The ES8500 Series platform and ES7744 Transition Stairs are recommended for use at the manhole, roof stairs, and sidewall ladder or stairs.
- For unstiffened bins, see pgs. 4 & 5 utilizing the ladder platform and platform fillers.

Drawing illustrates (1) AWD213 with (2) AWD001 Mounts

A-Series Sidewall Deck (Eave Walkaround)

US Patent: 8,595,989

Drawing illustrates (1) AWD302 with (2) AWD001 Mounts

Item	Description	List Price	Weight

AMA03024

End View

AMA03036

Ordering Information: *The A-Series Manwalk system is designed to support 60 psf in accordance with ASCE 7-2010, or 150 lbs per linear foot. Manwalk prefixed with AMA meet the minimum 60 psf standard. Manwalk prefixed with AMB are considered heavy duty and are used for greater load capacity. Walkway width is 30", and the overall width is 37.5"*

A-Series Variable Stairs

Ordering Information: Variable stairs are designed to run 17 steps unsupported, with a load capacity of 500 lbs. At a 30° pitch, the step rise is 6.75" and the step run is 11.69". At a 45° pitch, the step rise is 9.5" and the step run is 9.5". Order (1) Manwalk entry kit per stair run.

Item	Description	List Price
AVT1601	A-Series 1 Step Variable Stair Section	\$ 438.00
AVT1602	A-Series 2 Step Variable Stair Section	\$ 581.00
AVT1603	A-Series 3 Step Variable Stair Section	\$ 725.00
AVT1604	A-Series 4 Step Variable Stair Section	\$ 870.00
AVT1605	A-Series 5 Step Variable Stair Section	\$ 1,022.00
AVT0001	A-Series Variable Stair Manwalk Entry Kit (bottom round rails included)	\$ 252.00
ASG100	A-Series Self Closing Gate, Galvanized	\$335.00

A-Series Foundation Deck

Ordering Information: Designed for mounting to the concrete stem wall of the bin for access to the bin door, a ladder or a sidewall stair, particularly over tunnels. Ordered as a 3 section, 2 section or a single section. Load rated at 1000 lbs.

Item	Description	List Price	Weight	Tunnel Width
AFD003	3 Section Foundation Deck 144"	\$4,258.00	600 lbs	99"
AFD002	2 Section Foundation Deck 96"	\$3,577.00	504 lbs	53"
AFD001	1 Section Foundation Deck 48"	\$2,701.00	380 lbs	17"

A-Series Tower Stairs

Call for quote

- Heights to 100' with 12' tower stages
- Two Leg Tower Posts are 80" apart to create a 7' x 14' footprint
- Stair Flights are adjustable from 64", 72", and 80" to access multiple platform elevations
- Landing Platforms are 30" x 84" to allow for 30" walking surfaces
- Bolt-together construction
- Requires minimal foundations
- Great for upgraded access to replace ladders and reduce fall risk associated with ladders
- For use beside new or existing bin or silo, flat storage building, or leg tower

Conveyor Support

Ordering Information: Manwalk pitch should not exceed 20° or 4.3":12". For steeper inclines, specify VP for variable pitch stair degree to 45°, or RS for roof stairs to 35°. Example: 69420VP or 69420RS. No extra charge for either option. The manwalk deck of the conveyor support consumes 26" of the width of the support. 48" support has 22" of conveyor space, 42" has 16" of conveyor space, 36" has 10" of conveyor space, and the 28" is for Bridged Manwalk. Allow 2" clearance from outside to kickboard on Manwalk.

Item	Description	List	
		Price	Weight
69280	10' 28"x17" Bridged Manwalk/Handrails	\$2,628.00	302 lbs
69360	10' 36"x17" Conveyor Support/Handrails	\$2,740.00	314 lbs

Wall Mount Loop Supports

(Not for Manwalk or Conveyor Support)

Items are sold individually.

Ordering Information:

- Order 1 WM1036 for every 10' of sidewall height, plus extensions and kickers above the eave
- WM3020 has 20' long siderails and overall spread of kickers is 28' (14' on center)
- WM3010 has 10' long siderails and overall spread of kickers is 16' (8' on center)
- Overall width 36" with 31" between siderails
- Clearance from bin wall is 8", the outside of the tower is 12" from the bin wall
