

Digital Lensmeter
DLR500

Digital Lens Meter DLR500

1. Sliding Nose Pad Frame
2. 7" LCD Screen
3. Lens Fixing Frame
4. On / Off Switch
5. Reading Switch
6. Point Button
7. Lens Table
8. Lens Base
9. Printer

Features:

- 7-inch high-resolution LCD screen monitor
- Wide measurements range (-25D ~ +25D)
- Flexible adjustable lens reader (without the use ABBE number)
- Auto lens meter for progressive, bifocal, trifocals, hard and soft contact lenses.
- Measures refraction, astigmatism, and prism lenses
- UV measurement interface & PD on both eyes
- Accurate optical center marking (ink cartridge included)
- Designed optical system for dark lenses, can do measurements for the dark lens only 5% of light transmittance

Product Information

LCD monitors are designed to view until 110 degrees so that the user could operate the machine more effectively.

DLR 500 interface showcases the ability to modify the systems parameter to change any measurement modes.

Accurate lens detectors readers with a wide measurements of double (triple) vision lens. Built in optical center markers for precise reading.

The Auto lens meter could measure UV accurately without compensation of UV transmittance ratios between (-25D ~ +25D)

Built-in high-speed thermal printer, compatible with Viewlight products. Replaceable printing paper.

Viewlights vision lens measurement software is designed for precise reading and auto detection progressive lens.
