DESCRIPTION: Here is a rare Shakespeare Model B-1 Hunter all fiberglass bow in a heavy hunting draw weight. This bow is practically indestructible. Still has the original leather grip. The riser and limbs look greenish in the pictures, but are actually light brownish. I recently shot this bow and it is remarkably fast and accurate. Would make a great bow-fishing bow, or for the occasional hunter who hunts in all weather conditions. Bow has no cracks; limbs are straight. The limbs are thicker at the tips for reinforcement. No drilled holes; Decal is in poor condition. Comes with a used string that is still in good condition.
