Mission Statement

"To serve our customers by using our expertise and our hard-working employees to provide the best service possible. To do what we tell the customers we will do and do it correctly. We are here because of our customers and we have not and will not forget that."

Background

Galloway Construction, LLC. was formed in 1980 with the forethought that there was a need for our service. We began constructing electrical power lines and clearing right of ways under existing power lines. This was done on a contract basis per unit with an hourly rate crew. At its inception, the company had two trucks and six employees. At the present time, it has grown to a fleet of over forty-five trucks, thirty-one pieces of equipment and more than sixty-five employees.

At Galloway Construction, LLC., we strive to do what we tell the customer we will do, do it right and do it the way the customer wants. We are customer-oriented because we know who pays the bills. Our expertise along with our hard-working employees can please even the most demanding of customers.

Safety is our top priority. All employees must complete safety training programs. We are also a drug-free workplace. As part of our continuous training, our employees complete a lineman program, certified by the TVPPA (Tennessee Valley Public Power Association). This includes four years of on-the-job training combined with classroom training.

Galloway Construction, LLC. is also either audited or reviewed on a yearly basis by the accounting firm of Daniels, Uselton & Clay, CPA.

In closing, I would like to thank all the customers who support Galloway Construction, LLC. We look Forward to providing you with quality service in the years to come.

Roger Galloway
