

## 20-40 Line LED Facia

### General Overview:

The 20-40 Line LED Facia was designed to work in conjunction with the 20 Zone Annunciator. The LED facia can be used in annunciator systems in multiples of 20.

The same LED Facia for a 20 Zone Annunciator can be expanded to a 40 zone, 60 zone or more if needed.

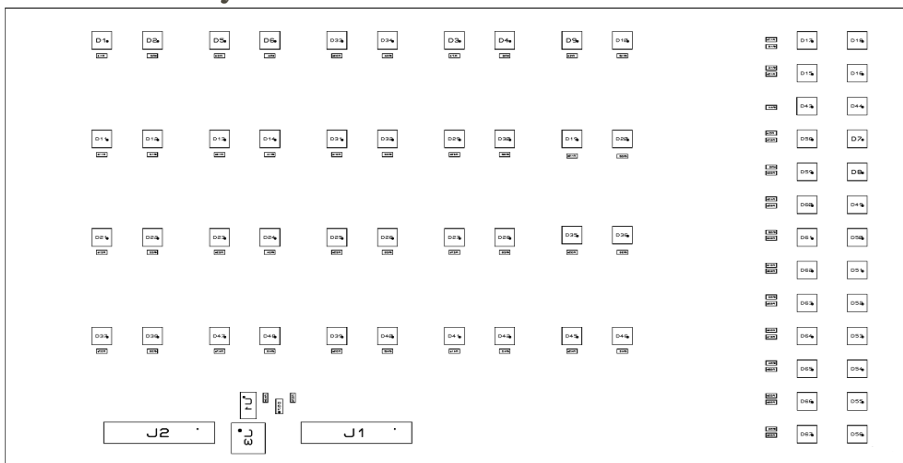

### General Specifications:

1. Supply input voltage: 12VDC.
2. Number of illuminating LEDs: 66
3. Number of output indication zones: 33
4. External input: 1 x Double LED

### General Operation:

The LED Facia uses 2 x Light emitting diodes to visually display each specific line alarm of the annunciator. This offers a dual redundancy in visual indication. The color of the LEDs can be changed to suit the specific application.

### General Layout of PCB:
