Fax: (855) 299-5827

## **Process of material acceptance for each project**

1. Prospective customer fills out **Application for Incoming Fill Material** form
2. Prospective customer fills out appropriate IEPA form if project contains any uncontaminated soils
  - 2.1. **LPC-662** Source Site Certification by Owner
    - 2.1.1. Most agricultural and residential projects
    - 2.1.2. Filled out by site owner or operator
  - 2.2. **LPC-663** Soil Certification by Licensed Engineer or Geologist
    - 2.2.1. Most commercial or industrial projects
    - 2.2.2. Filled out by licensed engineer or geologist
3. Prospective customer fills out appropriate IEPA form if project will contain painted aggregate
  - 3.1. **LPC-667** Painted CCDD Certification form
    - 3.1.1. Any aggregate that contains paint
    - 3.1.2. Filled out by licensed engineer or geologist
4. Plano Clean Fill checks to ensure soil was not from a regulated environmental remediation program:
5. Upon project approval, load will be accepted at Plano Clean Fill
6. Each load will be visually inspected as well as tested with a PID
  - 6.1. If load is approved:
    - 6.1.1. The driver will receive a ticket indicating acceptance and billing, trucking, generator location, and accumulated dumps
    - 6.1.2. The driver will drop the load in the designated spot.
    - 6.1.3. The operator will visually inspect the load and signal the driver of acceptance. If the operator determines the load is unacceptable due to refuse, rebar, or other contaminants, he will indicate the load will need to be reloaded and the necessary fee will be charged.
  - 6.2. If the load is rejected:
    - 6.2.1. The load rejection form (**LPC-655**) will be filled out by Plano Clean Fill
    - 6.2.2. One copy will be sent with the driver
    - 6.2.3. One copy will be sent to the IEPA

\* All forms available on our website [www.PlanoCleanFill.com](http://www.PlanoCleanFill.com)
