As a guide service, we meet customers at a specific location based on what we're doing that day.

All rock climbing, rappelling and naturalist led hikes meet at Hocking State Forest Rock Climbing and Rappelling area parking lot per the maps and directions below...

From Logan: Take US 33 to Logan and exit South on SR 664.

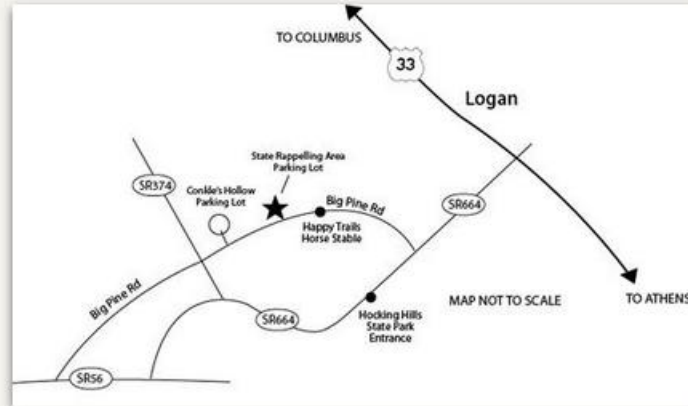

From US 33, travel four (4) miles South on SR 664 to Big Pine Rd. and turn right — there's a sign on SR 664 marking Big Pine Rd. Take Big Pine 5.8 miles (8 to 10 minutes) to the gravel, half acre parking lot on the right. There's a sign on the opposite side of the road that says "Hocking State Forest Rock Climbing and Rappelling area, it's pictured below. Per the map to the right, the parking lot is located between Happy Trails Horse Back Riding and Conkle's Hollow Nature Preserve on Big Pine Rd. This is the only gravel parking lot on Big Pine Rd. **There are no buildings or restroom at the parking area.**

The map to the right is simplified and not to scale. Both SR 664 and Big Pine Rd are windy and hilly so it can seem like you've traveled farther than actual. From Logan, be sure to follow the SR 664 signs through the bends in the road 4 miles to Big Pine. **Allow for extra time and know that cell phones likely won't work.**

From Hocking Hills State Park Lodge or Campground area: Drive South on SR 664/SR 374 past Grandma Faye's to SR 374 North. Turn right on SR 374 North and travel downhill to Big Pine Rd. Turn right on Big Pine Rd. (Pine Grove Methodist Church on the corner). Drive one mile beyond Conkle's Hollow State Nature Preserve to the gravel parking lot on your left. If you reach Happy Trails riding stable you've gone about 1 mile too far.

GPS IS NOT RELIABLE There's no designated street address for the parking area. Pretend it's the 90's, leave early and use a map! The Hocking Hills visitor guide magazine includes a double wide county map that shows the rock climbing and rappelling area on the left page. Otherwise, Happy Trails Riding Stable is about 1/2 mile east of the parking area. Please note, it's common for GPS systems to be misleading or unavailable due to lack of mobile phone coverage.
