February 15, 2017  
Sparks Nevada, USA.  
**PRESS RELEASE**

**Safe Sterilization USA** of South Plainfield NJ announces the opening of a second Safe Steam Sterilization facility, strategically located just minutes from the Tahoe-Reno International Airport in Sparks Nevada. The five acre site in the growing Tahoe-Reno Industrial Center (TRIC) is now fully operational.

Safe Sterilization is a revolutionary patented continuous heat & steam process for bio burden reduction in food ingredients by which no harmful chemicals or radiation is used to produce a clean, safe and healthy ingredient without reducing its vibrancy, nutrition or flavor in the transaction.

## Key market sectors served:

- Organic Packaged Foods
- Nutritional Foods
- Baby Food & Formula
- Pet Nutrition
- Functional Foods
- Weight & Diet Management
- Supplements
- Gourmet Foods
- Organic Cosmetics

SSUSA West is a GMP / NSF, Orthodox Union Kosher and Oregon Tilth Organic certified plant capable of toll processing four tons per cycle. Now with Safe Sterilization facilities on each coast of America, SSUSA will be able to offer convenient access to processing from whichever port products arrive.

## Why Safe Sterilization?

In an era when food safety is at the forefront of consumers and manufacturers priorities, Safe Sterilization is a vital part of the equation in food production.

Organic product sales alone have grown over 18% since 2015. There is no better choice to safely sterilize dry organic products for full flavor, color and bio-availability.
