

# Measurements Quick Reference

## Common Cannabis Weights

1/8 oz = 3.54 g

1/4 oz = 7.09 g

1/2 oz = 14.17 g

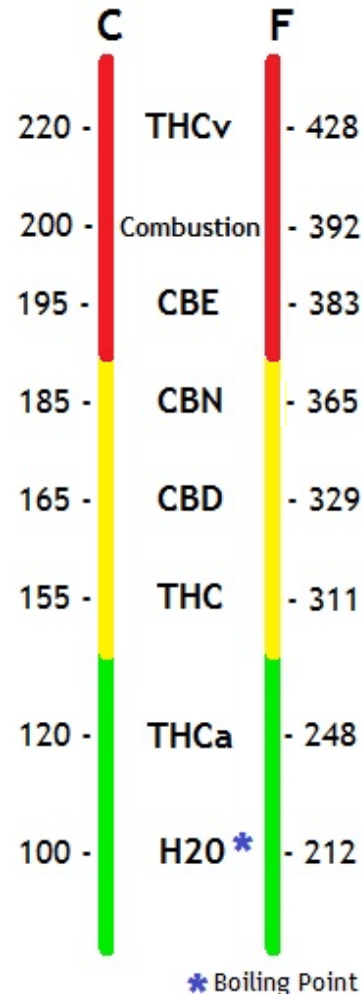

1 oz = 28.35 g

1 lb = 16 oz / 453.59 g

## Vaporization Points

## Metric Units

### Gram (G)

- metric unit of weight / mass
- 1,000G equals 1 Kilogram

### Milligram (MG)

- metric unit of weight / mass
- 1,000,000MG equals 1 kilogram

### Milliliter (ML)

- metric unit of volume
- 1ML equals one thousandth of a liter
- 1,000,000ML equals 1 cubic meter

1G = 1,000MG

1/2G = 500MG

1MG = 1ML

### IMPORTANT

1MG equals 1ML for H2O. The density of each liquid is unique. To convert MG to ML, the number of MG must be multiplied by the density of the liquid, which equals the volume in liters, and then divided by 1,000 to convert liters to milliliters.
