## Secure AI Personalisation Platform with Constitutional Memory Solution developed with Claude AI for Anthropic

### Problem

We create 'Secure AI-assisted Personal Profiles' that integrate with AI chatbots via API for truly personalized guidance. Unlike current AI systems that harvest data indiscriminately, we enable users to build intentional, controlled profiles that deliver 62% improvement in AI response relevance. We also solve 'Anthropic's Chat Memory problem'

### Solution

Our platform bridges the critical gap between generic AI responses & meaningful personalization via: MCQ-based Profile Generation, AI Integration API, & Progress Tracking. Users maintain complete data sovereignty while receiving guidance precisely tailored to their background, goals, and preferences. We're pioneering ethical AI personalisation.

### Business model

B2B2C

### Market

\$150BN AI market

### Traction

We have made a Partnership Proposal to Anthropic PBC, with an independent Evaluation made by Claude AI. We have 900+ pages of enterprise-grade code generated by Claude Opus 4 - the AI system that has verified it & will actually use our technology.
