

## **HYPER-OTF "On The Fly" Water Treatment System**

Modular Systems are set where clean water is needed and connects directly to the pipeline system, **no reservoir required.**

- Removes Hydrocarbons, Iron, Solids, H<sub>2</sub>S and Bacteria
- **Fully Automated** with remote access and data tracking
- Simplified Flow Thru System ensures **effective** "On The Fly" treatment

**Lower the Cost of Your Water**

**High Quality "On The Fly" Water!**

# AGT

## Water Systems

### Produced Water On The Fly

This system does not just oxidize the water and leave the contaminants in the fluid. This technology uses a flow thru system for "On The Fly" treatment, which removes the contaminants.

- Complete process removes solids, hydrocarbons, iron, bacteria and H<sub>2</sub>S
- Solids are removed by the process and not left in the tanks or to flow into the formation
- Pump which drives the process is duplexed, for built-in standby, to ensure continuous operation
- Unique Multi-Stage system removes the contaminants quickly

Before and  
after samples

**Delivers the following water quality at a very low cost**

- < 3 PPM Iron
- < 2 PPM Oil
- < 25 NTU Suspended Solids
- No H<sub>2</sub>S
- No Bacteria

- Self contained, fully automated systems process the water and are monitored with **AGT RSM**
- Compact Modular System Sizes from (30,000 to 60,000 BLD)
- These mobile systems can be moved as required, with plug and play set-up
- Come visit one of our systems and see the difference
