

BLACK 60 DURO SKIRTBOARD RUBBER

PRIME-LINE PLSB-60 Skirtboard is compounded specially for holding material on conveyor belting without excessive spillage. It has great advantages over wooden boards, chute lining or worn belting. It is slightly softer than conveyor belting, yet stiff enough to properly guide materials being handled. As a result, it greatly reduces wear on belting. Standard and beveled types are available.

Mean Physical Properties

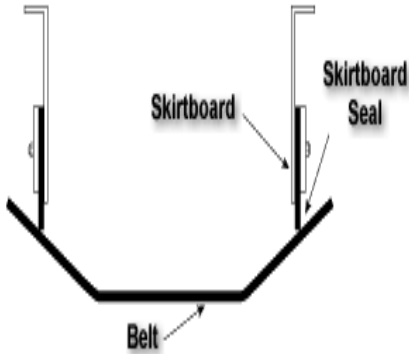

Common Name: Skirtboard Rubber

Color: Black

General Properties

- **Excellent abrasion-resistance**
- **Excellent weather-resistance**
- **Color: Black**
