1 DAY
WORKING WITH OTHERS

2 ROLES
TWO PROFESSIONS

3 WEEKS
INTERACTIVE LEARNING

9 DAYS
LEARNING ABOUT, FROM & WITH EACH OTHER

? LEARNING OUTCOMES?
BRIDGING CAMPUS TO COMMUNITY LEARNING
The Girl Next Door
“One of the best parts of this interaction for me was the ability to learn and share with one another. I was able to share my strengths as a student and learn to appreciate the strengths of student pharmacists.”

“We have the same goal: to provide excellent patient care, but we approach this goal from very different perspectives.”

“Because we know each other better, our interactions come easier and smoother when it comes to patient care... we feel comfortable to chime in and the visits became integrated in an organic way.”
Collaborative Clinical Education

- Shared Rotations
- Cross-professional preceptorships
- Shared Assignments & Didactics
- Common Patient Panel
For blood pressure, administer...
Early Shared Learning: Undergraduate Common Curriculum

- Introduction to the Health Professions
- Issues in Health Care
- Introduction to Evidence-Based Practice
- Ethics for IPE Practice
