

Spare no effort to achieve the perfect slumber.

Spare no effort to achieve the perfect slumber. Your mattresses could be giving you good support but if you constantly find yourself waking up with painful shoulders or hips, it means your existing mattress is too firm. Instead of throwing it out, you should consider investing in a Dunlopillo Latex Topper Pad.

This will add a plush and comfortable surface that will reduce the pressure on your shoulders and hips.

Available in four standard sizes, the latex core is covered in a cotton rich fabric with a distinctive channel quilted pattern.
