

Key Plan

Revisions

1 Level 05 - Life Safety Plan 3/32" = 1'-0"

General Notes

1) SEE COVER SHEETS FOR MORE DETAILED BUILDING CODE INFORMATION.

THE PURPOSE OF THE FIRE AND LIFE SAFETY DRAWINGS IS TO ILLUSTRATE IN SCHEMATIC FASHION, THE APPLICABLE EXITING, FIRE-RESISTANCE, AND LIFE SAFETY CONCEPTS UTILIZED BY THIS PROJECT; INCLUDING, BUT NOT LIMITED TO:

- OCCUPANCY CLASSIFICATIONS
- OCCUPANCY LOAD FACTORS
- EXIT LOCATIONS, EXIT PATHS & CAPACITY
- FUNCTION OF SPACE
- FIRE-RESISTANCE RATED CONSTRUCTION
- AND OTHER STRATEGIES RELATED TO THE CODE COMPLIANCE APPROACH OF THIS PROJECT.

2) ADDITIONAL DETAILED REQUIREMENTS APPLY TO THE CONSTRUCTION OF PARTITIONS, FIRE RATED DOOR ASSEMBLIES, INTERIOR GLAZED OPENINGS, DUCTS, SMOKE AND FIRE DAMPERS AND THROUGH PENETRATION FIRE STOPPING. REFER TO THE DRAWINGS OF EACH DISCIPLINE AND THE PROJECT MANUAL FOR THESE REQUIREMENTS, IF APPLICABLE.

3) ADDITIONAL DETAILED REQUIREMENTS SHOWN ELSEWHERE MAY REQUIRE CONSTRUCTION HAVING GREATER FIRE RATINGS, MORE EXTENSIVE FIRE-RATED CONSTRUCTION, OR MORE COMPLEX ASSEMBLIES THAN INDICATED. WHEN PROVIDED, THE ADDITIONAL DETAILED REQUIREMENTS SHALL GOVERN.

4) FIRE BARRIERS SHALL EXTEND FROM THE TOP OF THE FOUNDATION OR FLOOR/CEILING ASSEMBLY BELOW TO THE UNDERSIDE OF THE FLOOR OR ROOF SHEATHING, SLAB OR DECK ABOVE AND SHALL BE SECURELY ATTACHED THERETO. SUCH FIRE BARRIERS SHALL BE CONTINUOUS THROUGH CONCEALED SPACES.

5) WHERE APPLICABLE, SHAFT ENCLOSURES SHALL BE CONSTRUCTED AS FIRE BARRIERS.

6) WHERE APPLICABLE, FIRE PARTITIONS SHALL EXTEND FROM THE TOP OF THE FOUNDATION OR FLOOR/CEILING ASSEMBLY BELOW TO THE UNDERSIDE OF THE FLOOR OR ROOF SHEATHING, SLAB OR DECK ABOVE OR TO THE FIRE-RESISTANCE-RATED FLOOR/CEILING OR ROOF/CEILING ASSEMBLY ABOVE, AND SHALL BE SECURELY ATTACHED THERETO.

7) WHERE APPLICABLE, SMOKE BARRIERS SHALL FORM AN EFFECTIVE MEMBRANE CONTINUOUS FROM OUTSIDE WALL TO OUTSIDE WALL AND FROM THE TOP OF THE FOUNDATION OR FLOOR/CEILING ASSEMBLY BELOW TO THE UNDERSIDE OF THE FLOOR OR ROOF SHEATHING, DECK OR SLAB ABOVE, INCLUDING CONTINUITY THROUGH CONCEALED SPACES.

8) WHERE APPLICABLE, SMOKE PARTITIONS SHALL EXTEND FROM THE TOP OF THE FOUNDATION OR FLOOR BELOW TO THE UNDERSIDE OF THE FLOOR OR ROOF SHEATHING, DECK OR SLAB ABOVE OR TO THE UNDERSIDE OF THE CEILING ABOVE WHERE THE CEILING MEMBRANE IS CONSTRUCTED TO LIMIT THE TRANSFER OF SMOKE.

9) WHERE APPLICABLE, DIRECTIONAL SIGNAGE SHALL BE PROVIDED AT EACH ELEVATOR LANDING AND STATE THE FOLLOWING: "IN FIRE EMERGENCY, DO NOT USE THE ELEVATOR. USE EXIT STAIRS."

10) INTERIOR WALL & CEILING FINISHES SHALL HAVE A FLAME SPREAD INDEX RATING OF NO MORE THAN CLASS B AT VERTICAL EXITS & EXIT PASSAGEWAYS AND EXIT ACCESS CORRIDORS AND OTHER EXITWAYS.

11) INTERIOR WALL & CEILING FINISHES SHALL HAVE A FLAME SPREAD INDEX RATING OF NO MORE THAN CLASS C AT ROOMS AND ENCLOSED SPACES.

12) ALL MATERIALS EXPOSED WITHIN DUCTS OR PLENUMS SHALL HAVE A FLAME SPREAD RATING INDEX NOT MORE THAN 25 AND A SMOKE DEVELOPED RATING OF NOT MORE THAN 50.

13) FIRE EXTINGUISHERS SHALL BE LOCATED SUCH THAT A MAXIMUM TRAVEL DISTANCE OF 75' SHALL NOT BE EXCEEDED (WHERE REQUIRED BY CODE).

14) LEVEL/ AREA MAIN OCCUPANCY EXIT SIGN LOCATIONS MAY NOT BE SHOWN. REFERENCE ELECTRICAL SHEETS FOR ALL EXIT SIGN LOCATIONS.

15) FIRE RESISTIVE ASSEMBLY DETAILS, IF APPLICABLE, ARE LOCATED ELSEWHERE IN THIS DRAWING SET PER THE SHEET INDEX.

16) WHERE APPLICABLE, ELEVATOR HOISTWAY OPENINGS SHALL BE PROTECTED AS REQUIRED BY THE CODE, CORRESPONDING TO THE RATING OF THE HOISTWAY.

17) EVERY ASSEMBLY OCCUPANCY ROOM OR SPACE SHALL HAVE THE OCCUPANT LOAD POSTED IN A CONSPICUOUS PLACE.

18) STRUCTURAL ELEMENTS, FIXTURES OR FURNISHINGS SHALL NOT PROJECT HORIZONTALLY FROM EITHER SIDE MORE THAN 4 INCHES OVER ANY WALKING SURFACE BETWEEN 27 INCHES AND 80 INCHES ABOVE THE WALKING SURFACE. EXCEPTION: HANDRAILS SERVING STAIRS AND RAMPS ARE PERMITTED TO PROTRUDE 4 1/2 INCHES FROM THE WALL.

19) THE PATH OF EGRESS TRAVEL EXITS AND WITHIN EXITS IN THIS BUILDING SHALL BE IDENTIFIED BY EXIT SIGNS CONFORMING TO THE REQUIREMENTS OF SECTION 1011 AND AS NOTED BELOW:

1) EXIT SIGNS SHALL BE READILY VISIBLE FROM ANY DIRECTION OF EGRESS TRAVEL.
2) EXIT SIGNS SHALL BE LOCATED AS NECESSARY TO CLEARLY INDICATE THE DIRECTION OF EGRESS TRAVEL.
3) NO POINT IN A CORRIDOR SHALL BE MORE THAN 100 FT OR THE LISTED VIEWING DISTANCE FOR THE SIGN, WHICHEVER IS LESS, FROM THE NEAREST VISIBLE EXIT SIGN.

20) EGRESS DOORS OR GATES SHALL BE OPENABLE FROM THE EGRESS SIDE WITHOUT THE USE OF A KEY, SPECIAL KNOWLEDGE OR EFFORT. DOOR HANDLES, PULLS, LATCHES, LOCKS AND OTHER OPERATING DEVICES SHALL BE INSTALLED 34 INCHES TO 48 INCHES ABOVE FINISHED FLOOR. MANUALLY OPERATED FLUSH BOLTS OR SURFACE BOLTS ARE NOT PERMITTED. THE UNLATCHING OF ANY DOOR OR LEAF SHALL NOT REQUIRE MORE THAN ONE OPERATION.

Occupancy Load - TAC 5th Floor

PER 2012 NFPA 101 CHAPTER 7

Project Square Footage: Useable Area = 35,018 SF
Project Use and Classification: Business Occupancy (Sprinkled)
Assembly Occupancy (Sprinkled)
Storage (Non-Mercantile)

Maximum Occupant Load Calculation for the floor (per NFPA 101 Table 7.3.1.2):

Doors (3) at 34" (clear) are provided - 102/2" = 510 Occupants Allowed
Stairs (3) at 44" are provided - 132/0.3 = 440 Occupants Allowed
Maximum Occupant Load per floor = 999 Occupants Allowed (maximum for three exits)

Business Occupancy: Business Occupancy Load:	18,757 sf 1 Person per 100 GSF = 188 Occupants
Assembly Occupancy: Assembly Occupancy Load:	3,611 sf 1 Person per 15 NSF = 241 Occupants
Storage Occupancy: Storage Room Occupancy Load:	1,965 sf 1 Person per 500 GSF = 4 Occupants

Total Occupant Load for the Floor: 433 Occupants
Maximum Occupancy Load for the Floor Provided: 440 Occupants

Total Exits: 3 Exits
Travel Distance Allowed: 300 feet (w/ Approved Sprinkler System)
Common Path of Travel Allowed: 100 feet (w/ Approved Sprinkler System)
Dead End Corridor Allowed: 50 feet (w/ Approved Sprinkler System)

DOOR FRAME TYPES

GENERAL NOTES

- Hardware schedule indicates general intent of hardware operation for the doors in the facility. All necessary components, accessories, and writing required for complete installation shall be provided by the Contractor / door hardware vendor and reviewed and approved by Architect and owner.
- All hardware provided and keyed by General Contractor, unless noted otherwise.
- Provide strike plates for all doors. For door frames by modular wall manufacturer, provide strike plate type as recommended by door frame manufacturer. For hollow metal door frames, provide strike plate as recommended by door hardware manufacturer for application.
- Provide silencer sets on all hollow metal door frames not to receive gasketing.
- All hardware provided and keyed by General Contractor, unless noted otherwise.
- All closers shall be concealed type.
- Existing hardware to be relocated for reuse with existing doors.

HARDWARE SCHEDULE

SET DESCRIPTION

Hardware Type 1
Relocated Entry Door

- (1) Lockset (Existing Reuse)
- (2) Pair of Butts
- (1) Electronic door strike
- (4) Pair of Butts
- (1) Gasketing full door perimeter
- (1) Stop floor mounted
- (1) Closer

Hardware Type 2
Existing Pair of Doors

- (2) Dummy Sets
- (2) Roller catches at head
- (4) Pair of Butts
- (2) Stops floor mounted

Hardware Type 3
Falk Built Entry Door

- (2) Pair of 48" pulls
- (2) Pair of Door Pivots
- (2) ASSA Abloy maglocks
- (2) Stops floor mounted

Hardware Type 4
Falk Built Glass Pivot Door

- (1) Pair of 48" pulls
- (1) Pair of Door Pivots
- (1) Stop floor mounted

Hardware Type 5
Falk Built Glass Sliding Door

- (1) Pair of 48" pulls
- (1) Sliding door header

Hardware Type 6
Falk Built Wood Pivot Door

- (1) Pair Bldg Std Hardware
- (1) Pair of Door Pivots
- (1) Stop floor mounted

Hardware Type 7
Falk Built Wood Sliding Door

- (1) Pair of 48" pulls
- (1) Sliding door header

Hardware Type 8
Re-Used Privacy Door
Thumb-Turn/Occupancy

- (1) Pair Bldg Std Hardware
- (1) Pair of Butts
- (1) Privacy Lockset
- (1) Stop floor mounted

Hardware Type 9
Falk Built Wood Pivot Door Typ.

- (1) Pair of 48" pulls
- (1) Pair of Door Pivots
- (1) Stop floor mounted

Hardware Type 10
Existing Door

- (1) Dummy Sets
- (1) Roller catches at head
- (4) Set of Butts
- (1) Stops floor mounted

Hardware Type 11
Store Room Function

- (1) Pair Bldg Std Hardware
- (4) Pair of Butts
- (1) Stop floor mounted

Hardware Type 12
Passage Function

- (1) Pair Bldg Std Hardware
- (4) Pair of Butts
- (1) Stop floor mounted

Doors & ADA
Information

Two Ameris Center
Fifth Floor
3500 Piedmont Road NE
Atlanta, GA 30305

Key Plan

Area of Work - Fifth Floor

1 Level 05 - Demo Plan A 1/8" = 1'-0"

General Notes

- Do not scale drawings. Dimensions govern.
- Demolition/Restoration items may not be inclusive. The demolition contractor is to review the requirements of new construction and is to complete all demolition/restoration, cutting, and patching necessary to achieve intended new condition quality.
- Field verify all existing conditions and notify architect of any discrepancies in writing prior to onset of demolition.
- Selective demolition is not indicated in areas where it may be necessary to demolish all or part of existing building component to gain access to areas for tie-in to building systems, or which may be required to install new construction indicated on the drawing. Demolition for these purposes shall be done at no additional cost to owner, and these areas shall be returned to their original condition prior to beginning construction.
- Demolition work shall be executed in conformance with local building code.
- Exercise extreme caution in this demolition. Cost of repair to any adjacent conditions which are damaged as a result of this demolition shall be the responsibility of the contractor.
- All materials to be disposed of are to be disposed of by the contractor off the project site in accordance with local restrictions unless noted otherwise herein.
- Remove, salvage and store all existing doors, frames and sidelites for reuse, unless noted otherwise.
- Remove all existing plumbing fixtures and accessories. Cap drain lines.

- Remove, salvage and store all existing ceiling grid, tile and light fixtures for reuse.
- Remove all existing gypsum board ceiling.
- Remove all existing floor finishes and substrate. In areas where demolition causes unevenness in the floor slab, perform the necessary work required to provide a smooth slab prepared to receive new finishes.
- All areas shall be kept in a broom clean condition at all times.
- Patch and repair all areas where a demolished wall intersects a remaining wall. Either finish existing wall to match adjacent surfaces or prepare wall to receive new finishes.
- Protect all structural members from damage.
- During demolition, brace all existing structures as needed.
- Do not cut structural work in a manner resulting in a reduction of load carrying capacity or load/deflect ratio. Notify Architect of all structural cuts prior to execution to obtain approval.
- Provide alternate pricing for cable abatement by cable vendor. All accessible abandoned cable that is not terminated and labeled on both ends must be removed to meet NFPA and NEC 2002 code requirements. Contractor shall coordinate removal of any cable with building owner before any cable removal actually begins.

Demolition Plan

5-IA-1.1A

Key Plan

1 Level 05 - Demo Plan B 1/8" = 1'-0"

General Notes

1. Do not scale drawings. Dimensions govern.

2. Demolition/Restoration items may not be inclusive. The demolition contractor is to review the requirements of new construction and is to complete all demolition/restoration, cutting, and patching necessary to achieve intended new condition quality.

3. Field verify all existing conditions and notify architect of any discrepancies in writing prior to onset of demolition.

4. Selective demolition is not indicated in areas where it may be necessary to demolish all or part of existing building component to gain access to areas for tie-in to building systems, or which may be required to install new construction indicated on the drawing. Demolition for these purpose shall be done at no additional cost to owner, and these areas shall be returned to their original condition prior to beginning construction.

5. Demolition work shall be executed in conformance with local building code.

6. Exercise extreme caution in this demolition. Cost of repair to any adjacent conditions which are damaged as a result of this demolition shall be the responsibility of the contractor.

7. All materials to be disposed of are to be disposed of by the contractor off the project site in accordance with local restrictions unless noted otherwise herein.

8. Remove, salvage and store all existing doors, frames and sidelites for reuse, unless noted otherwise.

9. Remove all existing plumbing fixtures and accessories. Cap drain lines.

10. Remove, salvage and store all existing ceiling grid, tile and light fixtures for reuse.

11. Remove all existing gypsum board ceiling.

12. Remove all existing floor finishes and substrate. In areas where demolition cause unevenness in the floor slab, perform the necessary work required to provide a smooth slab prepared to receive new finishes.

13. All areas shall be kept in a broom clean condition at all times.

14. Patch and repair all areas where a demolished wall intersect a remaining wall. Either finish existing wall to match adjacent surfaces or prepare wall to receive new finishes.

15. Protect all structural members from damage.

16. During demolition, brace all existing structures as needed.

17. Do not cut structural work in a manner resulting in a reduction of load carrying capacity or load/deflect ration. Notify Architect of all structural cuts prior to execution to obtain approval.

18. Provide add alternate pricing for cable abatement by cable vendor. All accessible abandoned cable that is not terminated and labelled on both ends must be removed to meet NFPA and NEC 2002 code requirements. Contractor shall coordinate removal of any cable with building owner before any cable removal actually begins.

Demolition Plan

5-IA-1.1B

Key Plan

Area of Work - Fifth Floor

Revisions

1 Level 05 - Partition Plan A 1/8" = 1'-0"

General Notes

- Do not scale drawings. Dimensions govern.
- Contractor to verify all existing conditions and notify architect of any discrepancies in writing.
- All dimensions shown on the drawings shall be considered critical. It shall be the responsibility of the contractor to notify the architect of any deviation in the placement of partition prior to the erection of the stud walls.
- All new interior partitions to be typed "A" unless noted otherwise.
- Walls to be located at center line of window mullion unless noted otherwise.
- New gypsum board construction meeting existing gypsum board construction in the same plane shall be flush with no visible joints showing. Remove existing metal corner bead(s) and other trim as required to receive new construction.
- Use water resistant panels at all break areas and locations noted for water service.
- Install fire treated blocking in all walls designated to support millwork or equipment i.e. cabinets, shelving, signage, TV mounting brackets, etc.
- Furr out all core walls/columns only where power or voice/data j-boxes are required.
- Contractor to chalk lines for all systems furniture locations at the time of wall layout. Refer to furniture plans for location. Coordinate pendant light fixture placement over workstations with architect and furniture vendor as required.
- Contractor to coordinate ceiling grid with location of walls prior to installation.

Key Notes

- TAC1 Only:** Owner-supplied IT cabinet to be placed in location shown, above Shred bin.

Area of Work - Fifth Floor

Revisions

1 Level 05 - RCP A 1/8" = 1'-0"

General Notes

- Do not scale drawing. Dimensions govern.
- All ceiling heights to be 9'-0" A.F.F., new ceiling to match existing, unless noted otherwise.
- All switches shall be mounted 4'-0" A.F.F. to centerline of switch unless noted otherwise.
- All switch cover plates shall be white & shall be mounted straight and aligned.
- Where multiple switches occur (switches, dimmers or both) gang groups of switches in the same box with one common cover plate.
- Down lights, fire alarm signal devices, exit signs, etc. to be located in center of ceiling tile unless noted otherwise.
- Contractor to review locations of all fire alarm signal devices and thermostats with architect prior to installation. These devices should be coordinated and aligned with other devices in the same plane.
- Contractor to maintain plastic covers over fluorescent fixtures during construction to avoid accumulation of dirt and finger prints on specular lens cover.

- Refer to engineer's drawings for fixtures tied to building emergency power systems.
- In the event of conflict between M.E.P. and Architectural drawings, notify architect before proceeding.
- Verify lighting layouts with plenum limitation prior to installations.
- Existing ceiling grid and remain, new ceiling grid to match existing. Replace all damaged wall angle tees, including but not limited to the holes in tees where walls have been demolished or relocated, unless noted otherwise.
- Sprinklers: Building standard sprinkler heads, for normal use, in a standard distribution pattern installed per building codes spaced to give coverage of 225 usable square feet per head. Relocate sprinklers as required to accommodate local code and light fixture placement. Provide concealed sprinkler heads at drywall ceilings or soffits.
- General Contractor is responsible for ensuring that all lamps are functional at the end of the job.
- All new fluorescent lamps are to be 3000 Kelvin and provided by the same manufacturer.

P&C Plan

5-IA-4.1A

1 Level 05 - P&C Plan A 1/8" = 1'-0"

General Notes

- Do not scale drawings. Dimensions govern.
- All receptacles, junction boxes and voice/data receptacles shall be mounted 18" A.F.F. to centerline of receptacle unless noted otherwise.
- All switches, keypads and wall phones shall be mounted 48" A.F.F. to centerline of device unless noted otherwise.
- All voice, data, and electrical cover plates shall be white in color and shall be mounted straight and aligned.
- All dimensions to devices are A.F.F. and to centerline or outlets and outlet groupings.
- Stagger electrical boxes 6" O.C. at back conditions and separate with a stud within wall.
- Group adjacent electrical devices in one box under common plate.
- All devices above countertops shall be mounted horizontally.
- Coordinate alignment of all devices such as outlets, fire alarm strobes, thermostats, etc. Review alignments with Architect prior to rough-in.
- Locations of floor and wall mounted power, voice/data feeds for systems furniture to be coordinated and verified by the contractor, architect and furniture vendor prior to floor coring or device installation.
- In the event of conflict between M.E.P. and architectural drawings, notify architect prior to proceeding.
- Verify outlet requirements for electrical appliances and equipment: Refrigerators, Vending Machines and copiers.
- Furniture and equipment shown is not in contract and will be provided and installed by owner. Dimensions shown reflect minimum requirements for code compliance only, based on this furniture configuration. Revisions to this should be revised for code compliance.
- Per NFPA 90A 4.3.10.2 Plenum rated cable required in return air plenum. Refer to engineering drawings.
- Any coring work must be scheduled 24 hours in advance with Engineer/Property Management. The General Contractor and/or other sub-contractors must demonstrate to Engineer/Property Management that they have carried out X-Raying or sonar investigation in order to ensure that no damage can occur to items in the slab. The General Contractor is responsible for any cost associated with the investigation and should include the cost in their bids. Coring should not be carried out through beams or joists.
- All power to support A/V equipment must be on same electrical phase in order to eliminate hum bars on project devices.
- Coordinate power requirements and mounting heights/placement with Owner's Vendor.

Key Notes

- TAC1 Only:** Quad outlet @ wall to service owner-supplied IT cabinet placed above in space above Shred bin.
- All Floors:** Coordinate junction boxes locations with furniture vendors

P&C Plan

5-IA-4.1B

1 Level 05 - Floor Finish Plan A 1/8" = 1'-0"

General Notes

- Do not scale drawings. Dimensions govern.
- All finishes to be installed in accordance with the manufacturers specifications and contract documents.
- All interior finishes shall be a minimum of class "C" fire rated finish.
- Contractor to provide client with all maintenance instructions for all finish materials provided by sub-contractor.
- All interior partitions shall receive one coat primer and two coats commercial grade eggshell latex paint unless noted otherwise.
- All recessed fire extinguisher cabinets shall be painted the color of the wall on which they occur.
- All wall finishes shall be PT-1 unless noted otherwise.
- All interior doors and door frames shall be PT-2 with semi-gloss finish unless noted otherwise.
- All flooring shall be CPT-1 unless noted otherwise.
- All rubber base shall be RB-1 and shall be 4" with finished edge where carpet is provided and cove base where VCT is provided unless noted otherwise.
- Provide transition strip between carpet and hard surface.
- Flooring installer to provide Installation Diagram for placement of hard surface flooring and carpet. Refer to drawings for intent of placement of tiles and patterns.
- Note: All final finished surfaces or furniture in fire rated lobby or egress areas are to have a minimum flame spread and smoke development rating of class "a" or "b" and a minimum radiant flux value of class 1 or 2. flame and smoke rating can be reduced to class "c" or class "b" where class "b" or class "a" is required and radiant flux value can be reduced to class 1 or none if the building has a sprinkler system. All final finish selections are to be reviewed by the Architect for compliance with this requirement. this requirements are set forth in n.f.p.a. 101.10.2, 10.2.8, 38.3.3 (new construction) and 39-3.3 (existing construction) and 101-3.3.120, 10.2 interior finish chapter of the 2003 or most current edition of the n.f.p.a 101 Life Safety Handbook.

1 Level 06 - Life Safety 3/32" = 1'-0"

General Notes

- 1) SEE COVER SHEETS FOR MORE DETAILED BUILDING CODE INFORMATION.

THE PURPOSE OF THE FIRE AND LIFE SAFETY DRAWINGS IS TO ILLUSTRATE IN SCHEMATIC FASHION, THE APPLICABLE EXITING, FIRE-RESISTANCE, AND LIFE SAFETY CONCEPTS UTILIZED BY THIS PROJECT; INCLUDING, BUT NOT LIMITED TO:

 - OCCUPANCY CLASSIFICATIONS
 - OCCUPANCY LOAD FACTORS
 - EXIT LOCATIONS, EXIT PATHS & CAPACITY
 - FUNCTION OF SPACE
 - FIRE-RESISTANCE RATED CONSTRUCTION
 - AND OTHER STRATEGIES RELATED TO THE CODE COMPLIANCE APPROACH OF THIS PROJECT.

2) ADDITIONAL DETAILED REQUIREMENTS APPLY TO THE CONSTRUCTION OF PARTITIONS, FIRE RATED DOOR ASSEMBLIES, INTERIOR GLAZED OPENINGS, DUCTS, SMOKE AND FIRE DAMPERS AND THROUGH PENETRATION FIRE STOPPING. REFER TO THE DRAWINGS OF EACH DISCIPLINE AND THE PROJECT MANUAL FOR THESE REQUIREMENTS, IF APPLICABLE.

3) ADDITIONAL DETAILED REQUIREMENTS SHOWN ELSEWHERE MAY REQUIRE CONSTRUCTION HAVING GREATER FIRE RATINGS, MORE EXTENSIVE FIRE-RATED CONSTRUCTION, OR MORE COMPLEX ASSEMBLIES THAN INDICATED. WHEN PROVIDED, THE ADDITIONAL DETAILED REQUIREMENTS SHALL GOVERN.
- 4) FIRE BARRIERS SHALL EXTEND FROM THE TOP OF THE FOUNDATION OR FLOOR/CEILING ASSEMBLY BELOW TO THE UNDERSIDE OF THE FLOOR OR ROOF SHEATHING, SLAB OR DECK ABOVE AND SHALL BE SECURELY ATTACHED THERETO. SUCH FIRE BARRIERS SHALL BE CONTINUOUS THROUGH CONCEALED SPACES.

5) WHERE APPLICABLE, SHAFT ENCLOSURES SHALL BE CONSTRUCTED AS FIRE BARRIERS.

6) WHERE APPLICABLE, FIRE PARTITIONS SHALL EXTEND FROM THE TOP OF THE FOUNDATION OR FLOOR/CEILING ASSEMBLY BELOW TO THE UNDERSIDE OF THE FLOOR OR ROOF SHEATHING, SLAB OR DECK ABOVE OR TO THE FIRE-RESISTANCE-RATED FLOOR/CEILING OR ROOF/CEILING ASSEMBLY ABOVE, AND SHALL BE SECURELY ATTACHED THERETO.

7) WHERE APPLICABLE, SMOKE BARRIERS SHALL FORM AN EFFECTIVE MEMBRANE CONTINUOUS FROM OUTSIDE WALL TO OUTSIDE WALL AND FROM THE TOP OF THE FOUNDATION OR FLOOR/CEILING ASSEMBLY BELOW TO THE UNDERSIDE OF THE FLOOR OR ROOF SHEATHING, DECK OR SLAB ABOVE, INCLUDING CONTINUITY THROUGH CONCEALED SPACES.

8) WHERE APPLICABLE, SMOKE PARTITIONS SHALL EXTEND FROM THE TOP OF THE FOUNDATION OR FLOOR BELOW TO THE UNDERSIDE OF THE FLOOR OR ROOF SHEATHING, DECK OR SLAB ABOVE OR TO THE UNDERSIDE OF THE CEILING ABOVE WHERE THE CEILING MEMBRANE IS CONSTRUCTED TO LIMIT THE TRANSFER OF SMOKE.
- 9) WHERE APPLICABLE, DIRECTIONAL SIGNAGE SHALL BE PROVIDED AT EACH ELEVATOR LANDING AND STATE THE FOLLOWING: "IN FIRE EMERGENCY, DO NOT USE THE ELEVATOR. USE EXIT STAIRS."

10) INTERIOR WALL & CEILING FINISHES SHALL HAVE A FLAME SPREAD INDEX RATING OF NO MORE THAN CLASS B AT VERTICAL EXITS & EXIT PASSAGEWAYS AND EXIT ACCESS CORRIDORS AND OTHER EXITWAYS.

11) INTERIOR WALL & CEILING FINISHES SHALL HAVE A FLAME SPREAD INDEX RATING OF NO MORE THAN CLASS C AT ROOMS AND ENCLOSED SPACES.

12) ALL MATERIALS EXPOSED WITHIN DUCTS OR PLENUMS SHALL HAVE A FLAME SPREAD RATING INDEX NOT MORE THAN 25 AND A SMOKE DEVELOPED RATING OF NOT MORE THAN 50.

13) FIRE EXTINGUISHERS SHALL BE LOCATED SUCH THAT A MAXIMUM TRAVEL DISTANCE OF 75' SHALL NOT BE EXCEEDED (WHERE REQUIRED BY CODE).

14) LEVEL/ AREA MAIN OCCUPANCY EXIT SIGN LOCATIONS MAY NOT BE SHOWN. REFERENCE ELECTRICAL SHEETS FOR ALL EXIT SIGN LOCATIONS.

15) FIRE RESISTIVE ASSEMBLY DETAILS, IF APPLICABLE, ARE LOCATED ELSEWHERE IN THIS DRAWING SET PER THE SHEET INDEX.
- 16) WHERE APPLICABLE, ELEVATOR HOISTWAY OPENINGS SHALL BE PROTECTED AS REQUIRED BY THE CODE, CORRESPONDING TO THE RATING OF THE HOISTWAY.

17) EVERY ASSEMBLY OCCUPANCY ROOM OR SPACE SHALL HAVE THE OCCUPANT LOAD POSTED IN A CONSPICUOUS PLACE.

18) STRUCTURAL ELEMENTS, FIXTURES OR FURNISHINGS SHALL NOT PROJECT HORIZONTALLY FROM EITHER SIDE MORE THAN 4 INCHES OVER ANY WALKING SURFACE BETWEEN 27 INCHES AND 80 INCHES ABOVE THE WALKING SURFACE. EXCEPTION: HANDRAILS SERVING STAIRS AND RAMPS ARE PERMITTED TO PROTRUDE 4 1/2 INCHES FROM THE WALL.

19) THE PATH OF EGRESS TRAVEL EXITS AND WITHIN EXITS IN THIS BUILDING SHALL BE IDENTIFIED BY EXIT SIGNS CONFORMING TO THE REQUIREMENTS OF SECTION 1011 AND AS NOTED BELOW:

 - 1) EXIT SIGNS SHALL BE READILY VISIBLE FROM ANY DIRECTION OF EGRESS TRAVEL.
 - 2) EXIT SIGNS SHALL BE LOCATED AS NECESSARY TO CLEARLY INDICATE THE DIRECTION OF EGRESS TRAVEL.
 - 3) NO POINT IN A CORRIDOR SHALL BE MORE THAN 100 FT OR THE LISTED VIEWING DISTANCE FOR THE SIGN, WHICHEVER IS LESS, FROM THE NEAREST VISIBLE EXIT SIGN.

20) EGRESS DOORS OR GATES SHALL BE OPENABLE FROM THE EGRESS SIDE WITHOUT THE USE OF A KEY, SPECIAL KNOWLEDGE OR EFFORT. DOOR HANDLES, PULLS, LATCHES, LOCKS AND OTHER OPERATING DEVICES SHALL BE INSTALLED 34 INCHES TO 48 INCHES ABOVE FINISHED FLOOR. MANUALLY OPERATED FLUSH BOLTS OR SURFACE BOLTS ARE NOT PERMITTED. THE UNLATCHING OF ANY DOOR OR LEAF SHALL NOT REQUIRE MORE THAN ONE OPERATION.

Occupancy Load - TAC 6th Floor

PER 2012 NFPA 101 CHAPTER 7	
Project Square Footage:	Useable Area = 16,739 SF
Project Use and Classification:	Business Occupancy (Sprinkled) Assembly Occupancy (Sprinkled) Storage (Non-Mercantile)
Maximum Occupant Load Calculation for the floor (per NFPA 101 Table 7.3.1.2):	
Doors (3) at 34" (clear) are provided - 102/2" = 510 Occupants Allowed	
Stairs (3) at 44" are provided - 132/0.3 = 440 Occupants Allowed	
Maximum Occupant Load per floor = 999 Occupants Allowed (maximum for three exits)	
Business Occupancy:	10,107 sf
Business Occupancy Load:	1 Person per 100 GSF = 102 Occupants
Assembly Occupancy:	1,721 sf
Assembly Occupancy Load:	1 Person per 15 NSF = 115 Occupants
Storage Occupancy:	925 sf
Storage Room Occupancy Load:	1 Person per 500 GSF = 2 Occupants
Total Occupant Load for the Floor:	219 Occupants
Maximum Occupancy Load for the Floor Provided:	440 Occupants
Total Exits:	3 Exits
Travel Distance Allowed:	300 feet (w/ Approved Sprinkler System)
Common Path of Travel Allowed:	100 feet (w/ Approved Sprinkler System)
Dead End Corridor Allowed:	50 feet (w/ Approved Sprinkler System)

Life Safety

6-G-0.2

DOOR ELEVATION TYPES

DOOR FRAME TYPES

GENERAL NOTES

- Hardware schedule indicates general intent of hardware operation for the doors in the facility. All necessary components, accessories, and writing required for complete installation shall be provided by the Contractor / door hardware vendor and reviewed and approved by Architect and owner.
- All hardware provided and keyed by General Contractor, unless noted otherwise.
- Provide strike plates for all doors. For door frames by modular wall manufacturer, provide strike plate type as recommended by door frame manufacturer. For hollow metal door frames, provide strike plate as recommended by door hardware manufacturer for application.
- Provide silencer sets on all hollow metal door frames not to receive gasketing.
- All hardware provided and keyed by General Contractor, unless noted otherwise.
- All closers shall be concealed type.
- Existing hardware to be relocated for reuse with existing doors.

HARDWARE SCHEDULE

SET	DESCRIPTION
Hardware Type 1 Relocated Entry Door	(1) Lockset (2) Pair of Butts (1) Electronic door strike (1) Gasketing full door perimeter (1) Stop floor mounted (1) Closer
Hardware Type 2 Existing Pair of Doors	(2) Dummy Sets (2) Roller catches at head (4) Pair of Butts (2) Stops floor mounted
Hardware Type 3 Falk Built Entry Door	(2) Pair of 48" pulls (2) Pair of Door Pivots (2) ASSA Abloy maglocks
Hardware Type 4 Falk Built Office Door	(1) Pair of 48" pulls (1) Pair of Door Pivots (1) Stop floor mounted
Hardware Type 5 Falk Built Sliding Door	(1) Pair of 48" pulls (1) Sliding door header
Hardware Type 6 Falk Built Wood Door	(1) Pair of 48" pulls (1) Pair of Door Pivots (1) Stop floor mounted

ADA MOUNTING LEGEND

Key Plan

1 Level 06 - Demo Plan A 1/8" = 1'-0"

General Notes

- Do not scale drawings. Dimensions govern.
- Demolition/Restoration items may not be inclusive. The demolition contractor is to review the requirements of new construction and is to complete all demolition/restoration, cutting, and patching necessary to achieve intended new condition quality.
- Field verify all existing conditions and notify architect of any discrepancies in writing prior to onset of demolition.
- Selective demolition is not indicated in areas where it may be necessary to demolish all or part of existing building component to gain access to areas for tie-in to building systems, or which may be required to install new construction indicated on the drawing. Demolition for these purposes shall be done at no additional cost to owner, and these areas shall be returned to their original condition prior to beginning construction.
- Demolition work shall be executed in conformance with local building code.
- Exercise extreme caution in this demolition. Cost of repair to any adjacent conditions which are damaged as a result of this demolition shall be the responsibility of the contractor.
- All materials to be disposed of are to be disposed of by the contractor off the project site in accordance with local restrictions unless noted otherwise herein.
- Remove, salvage and store all existing doors, frames and sills for reuse, unless noted otherwise.
- Remove all existing plumbing fixtures and accessories. Cap drain lines.
- Remove, salvage and store all existing ceiling grid, tile and light fixtures for reuse.
- Remove all existing gypsum board ceiling.
- Remove all existing floor finishes and substrate. In areas where demolition causes unevenness in the floor slab, perform the necessary work required to provide a smooth slab prepared to receive new finishes.
- All areas shall be kept in a broom clean condition at all times.
- Patch and repair all areas where a demolished wall intersects a remaining wall. Either finish existing wall to match adjacent surfaces or prepare wall to receive new finishes.
- Protect all structural members from damage.
- During demolition, brace all existing structures as needed.
- Do not cut structural work in a manner resulting in a reduction of load carrying capacity or load/deflection ratio. Notify Architect of all structural cuts prior to execution to obtain approval.
- Provide alternate pricing for cable abatement by cable vendor. All accessible abandoned cable that is not terminated and labeled on both ends must be removed to meet NFPA and NEC 2002 code requirements. Contractor shall coordinate removal of any cable with building owner before any cable removal actually begins.

Key Plan

1 Level 06 - Demo Plan B 1/8" = 1'-0"

General Notes

1. Do not scale drawings. Dimensions govern.

2. Demolition/Restoration items may not be inclusive. The demolition contractor is to review the requirements of new construction and is to complete all demolition/restoration, cutting, and patching necessary to achieve intended new condition quality.

3. Field verify all existing conditions and notify architect of any discrepancies in writing prior to onset of demolition.

4. Selective demolition is not indicated in areas where it may be necessary to demolish all or part of existing building component to gain access to areas for tie-in to building systems, or which may be required to install new construction indicated on the drawing. Demolition for these purposes shall be done at no additional cost to owner, and these areas shall be returned to their original condition prior to beginning construction.

5. Demolition work shall be executed in conformance with local building code.

6. Exercise extreme caution in this demolition. Cost of repair to any adjacent conditions which are damaged as a result of this demolition shall be the responsibility of the contractor.

7. All materials to be disposed of are to be disposed of by the contractor off the project site in accordance with local restrictions unless noted otherwise herein.

8. Remove, salvage and store all existing doors, frames and sidelites for reuse, unless noted otherwise.

9. Remove all existing plumbing fixtures and accessories. Cap drain lines.

10. Remove, salvage and store all existing ceiling grid, tile and light fixtures for reuse.

11. Remove all existing gypsum board ceiling.

12. Remove all existing floor finishes and substrate. In areas where demolition causes unevenness in the floor slab, perform the necessary work required to provide a smooth slab prepared to receive new finishes.

13. All areas shall be kept in a broom clean condition at all times.

14. Patch and repair all areas where a demolished wall intersects a remaining wall. Either finish existing wall to match adjacent surfaces or prepare wall to receive new finishes.

15. Protect all structural members from damage.

16. During demolition, brace all existing structures as needed.

17. Do not cut structural work in a manner resulting in a reduction of load carrying capacity or load/deflection ratio. Notify Architect of all structural cuts prior to execution to obtain approval.

18. Provide alternate pricing for cable abatement by cable vendor. All accessible abandoned cable that is not terminated and labeled on both ends must be removed to meet NFPA and NEC 2002 code requirements. Contractor shall coordinate removal of any cable with building owner before any cable removal actually begins.

Key Plan

Area of Work - Sixth Floor

1 Level 06 - Partition Plan A 1/8" = 1'-0"

General Notes

- Do not scale drawings. Dimensions govern.
- Contractor to verify all existing conditions and notify architect of any discrepancies in writing.
- All dimensions shown on the drawings shall be considered critical. It shall be the responsibility of the contractor to notify the architect of any deviation in the placement of partition prior to the erection of the stud walls.
- All new interior partitions to be typed "A" unless noted otherwise.
- Walls to be located at center line of window mullion unless noted otherwise.
- New gypsum board construction meeting existing gypsum board construction in the same plane shall be flush with no visible joints showing. Remove existing metal corner bead(s) and other trim as required to receive new construction.
- Use water resistant panels at all break areas and locations noted for water service.
- Install fire treated blocking in all walls designated to support millwork or equipment i.e. cabinets, shelving, signage, TV mounting brackets, etc.
- Furr out all core walls/columns only where power or voice/data j-boxes are required.
- Contractor to chalk lines for all systems furniture locations at the time of wall layout. Refer to furniture plans for location. Coordinate pendant light fixture placement over workstations with architect and furniture vendor as required.
- Contractor to coordinate ceiling grid with location of walls prior to installation.

General Notes

- Do not scale drawing. Dimensions govern.
- All ceiling heights to be 9'-0" A.F.F., new ceiling to match existing, unless noted otherwise.
- All switches shall be mounted 4'-0" A.F.F. to centerline of switch unless noted otherwise.
- All switch cover plates shall be white & shall be mounted straight and aligned.
- Where multiple switches occur (switches, dimmers or both) gang groups of switches in the same box with one common cover plate.
- Down lights, fire alarm signal devices, exit signs, etc. to be located in center of ceiling tile unless noted otherwise.
- Contractor to review locations of all fire alarm signal devices and thermostats with architect prior to installation. These devices should be coordinated and aligned with other devices in the same plane.
- Contractor to maintain plastic covers over fluorescent fixtures during construction to avoid accumulation of dirt and finger prints on specular lens cover.
- Refer to engineer's drawings for fixtures tied to building emergency power systems.
- In the event of conflict between M.E.P. and Architectural drawings, notify architect before proceeding.
- Verify lighting layouts with plenum limitation prior to installations.
- Existing ceiling grid and remain, new ceiling grid to match existing. Replace all damaged wall angle tees, including but not limited to the holes in tees where walls have been demolished or relocated, unless noted otherwise.
- Sprinklers: Building standard sprinkler heads, for normal use, in a standard distribution pattern installed per building codes spaced to give coverage of 225 usable square feet per head. Relocate sprinklers as required to accommodate local code and light fixture placement. Provide concealed sprinkler heads at drywall ceilings or soffits.
- General Contractor is responsible for ensuring that all lamps are functional at the end of the job.
- All new fluorescent lamps are to be 3000 Kelvin and provided by the same manufacturer.

Key Notes

- TAC6:** New 2'x4' and 2'x2' LED fixtures to be used throughout all floors where applicable. Existing 2'x4' and 2'x2' fixtures no longer needed for re-use.
- Not Used**
- Not Used**
- TAC5 Cafe Only:** Pendant fixtures @ Cafe:
-**MFTR:** ALW (ALWUSA.com)
-**Product:** Moonring MR3/Standard Suspension
-**Sizes:** Dimension shown @ each (outer diameter)
-**Color:** RAL Classic Color (Selection by Architect).

Atlanta, GA 30305

Key Plan

Area of Work - Sixth Floor

1 Level 06 - P&C Plan A 1/8" = 1'-0"

General Notes

- Do not scale drawings. Dimensions govern.
- All receptacles, junction boxes and voice/data receptacles shall be mounted 18" A.F.F. to centerline of receptacle unless noted otherwise.
- All switches, keypads and wall phones shall be mounted 48" A.F.F. to centerline of device unless noted otherwise.
- All voice, data, and electrical cover plates shall be white in color and shall be mounted straight and aligned.
- All dimensions to devices are A.F.F. and to centerline or outlets and outlet groupings.
- Stagger electrical boxes 6" O.C. at back conditions and separate with a stud within wall.
- Group adjacent electrical devices in one box under common plate.
- All devices above countertops shall be mounted horizontally.
- Coordinate alignment of all devices such as outlets, fire alarm strobes, thermostats, etc. Review alignments with Architect prior to rough-in.
- Locations of floor and wall mounted power, voice/data feeds for systems furniture to be coordinated and verified by the contractor, architect and furniture vendor prior to floor coring or device installation.
- In the event of conflict between M.E.P. and architectural drawings, notify architect prior to proceeding.
- Verify outlet requirements for electrical appliances and equipment: Refrigerators, Vending Machines and copiers.
- Furniture and equipment shown is not in contract and will be provided and installed by owner. Dimensions shown reflect minimum requirements for code compliance only, based on this furniture configuration. Revisions to this should be revised for code compliance.
- Per NFPA 90A 4-3.10.2 Plenum rated cable required in return air plenum. Refer to engineering drawings.
- Any coring work must be scheduled 24 hours in advance with Engineer/Property Management. The General Contractor and/or other sub-contractors must demonstrate to Engineer/Property Management that they have carried out X-Raying or sonar investigation in order to ensure that no damage can occur to items in the slab. The General Contractor is responsible for any cost associated with the investigation and should include the cost in their bids. Coring should not be carried out through beams or joists.
- All power to support A/V equipment must be on same electrical phase in order to eliminate hum bars on project devices.
- Coordinate power requirements and mounting heights/placement with Owner's Vendor.

Key Notes

- TAC1 Only:** Quad outlet @ wall to service owner-supplied IT cabinet placed above in space above Shred bin.
- All Floors:** Coordinate junction boxes locations with furniture vendors

Revisions

1 Level 06 - Floor Finish Plan A 1/8" = 1'-0"

General Notes

- Do not scale drawings. Dimensions govern.
- All finishes to be installed in accordance with the manufacturers specifications and contract documents.
- All interior finishes shall be a minimum of class "C" fire rated finish.
- Contractor to provide client with all maintenance instructions for all finish materials provided by sub-contractor.
- All interior partitions shall receive one coat primer and two coats commercial grade eggshell latex paint unless noted otherwise.
- All recessed fire extinguisher cabinets shall be painted the color of the wall on which they occur.
- All wall finishes shall be PT-1 unless noted otherwise.
- All interior doors and door frames shall be PT-2 with semi-gloss finish unless noted otherwise.
- All flooring shall be CPT-1 unless noted otherwise.
- All rubber base shall be RB-1 and shall be 4" with finished edge where carpet is provided and cove base where VCT is provided unless noted otherwise.
- Provide transition strip between carpet and hard surface.
- Flooring installer to provide Installation Diagram for placement of hard surface flooring and carpet. Refer to drawings for intent of placement of tiles and patterns.
- Note: All final finished surfaces or furniture in fire rated lobby or egress areas are to have a minimum flame spread and smoke development rating of class "a" or "b" and a minimum radiant flux value of class 1 or 2. flame and smoke rating can be reduced to class "c" or class "b" where class "b" or class "a" is required and radiant flux value can be reduced to class 1 or none if the building has a sprinkler system. All final finish selections are to be reviewed by the Architect for compliance with this requirement. this requirements are set forth in n.f.p.a. 101.10.2, 10.2.8, 38.3.3 (new construction) and 39-3.3 (existing construction) and 101-3.3.120, 10.2 interior finish chapter of the 2003 or most current edition of the n.f.p.a 101 Life Safety Handbook.
