12

Name _____ Date _____

1. Subtract. Show your work on the place value chart. Then record in vertical form.

   $3.45 - 1.63$

ones	tenths	hundredths

   $$\begin{array}{r} 3.45 \\ -\ 1.63 \\ \hline \end{array}$$

Subtract by using the standard algorithm.

2. $8.1 - 3.5 =$ _____

   $$\begin{array}{r} 8.1 \\ -\ 3.5 \\ \hline \end{array}$$

3. $4.1 - 1.4 =$ _____

4. $9.27 - 4.09 =$ _____

5. $7.08 - 4.12 =$ _____

6. $6.44 - 2.7 =$ _____

7. $5.5 - 3.13 =$ _____

REMEMBER

Write an expression that can be used to solve the problem.

8. Kelly has $6\frac{3}{10}$ cups of applesauce. She puts $\frac{1}{4}$ cup of applesauce on each of 3 plates. How many cups of applesauce does Kelly have left over?

---

9. Draw a model to divide.

$$\frac{1}{8} \div 3 = \underline{\hspace{2cm}}$$
