Corner Rounders

SCR-7

SCR-6

SCR-5

Shark Finishing Machinery introduces to its line of print finishing equipment a variety of corner rounding options. The SCR-5 & SCR-7 are capable of cornering up to 3" of stock at a time using any of the built in blades that can be selected from its rotary carousel. The rotary carousel allows you to quick and easily change the blade diameter you want to use with no tools needed. These electric, foot pedal operated corner rounders have been designed with a waste bin to keep the machine free from debris. The SCR-6 is our manual model which comes standard with a 1/4" blade and has variety of optional blades available. All of our corner rounders are easy to use, and requires only minimal maintenance.
