# New Lock Technology

Safewell North America has again broken through in introducing leading edge products to ensure your customers have the latest security options in locks. Please contact Safewell North America to set up a time to see the locks in use.

## Safewell North America Multi Open Option Facial Recognition Lock

Safewell North America introduces the first ever gun safe lock, that allows you to open your gun safe by the method you choose! You can register each user and define the way they can open the safe. You can have up to 100 different users.

**option A**

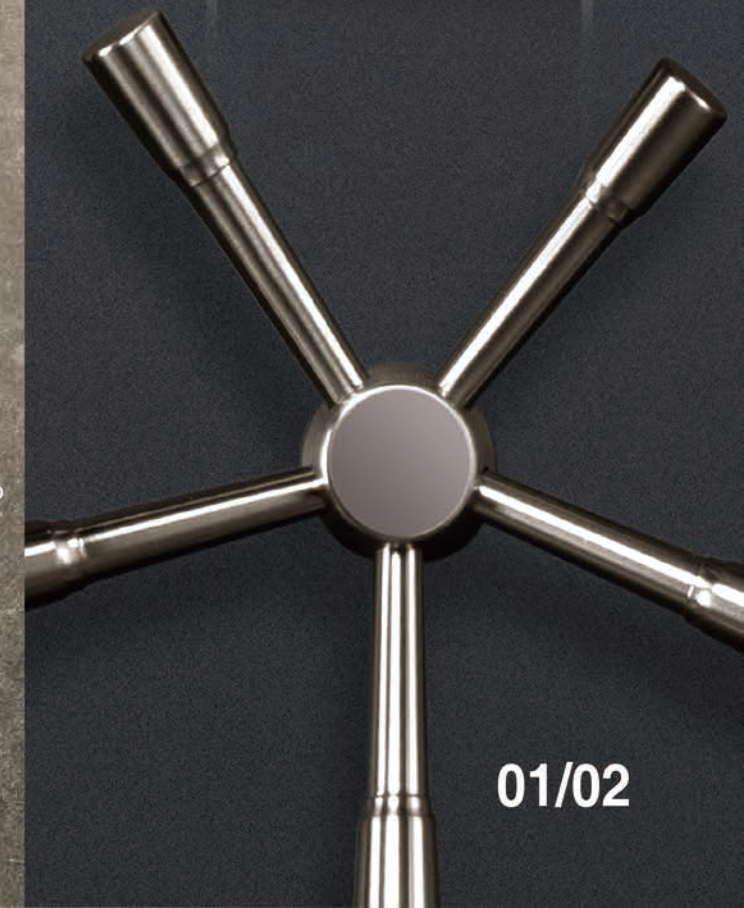

**option B**

### FEATURES

- Facial Recognition – Open your gun safe via Facial Recognition!
- Digital Combination: Each user can program their own unique 3-8 electronic combination to get into the safe
- RFID: Open the safe with the included RFID card or fob (only for option A)
- Safe Keys: Safewell Provides safe keys to manually open the safe

# BIO HUB LOCK

Safewell's Biometric Hub Lock (Bio-Hub) provides Biometric lock technology to long gun safes! This breakthrough concept allows for individual personal fingerprints to open your safe. It provides for a sleek new look in long gun safes as it eliminates the need for a lock on the outside. Of course, it still comes with an emergency key to open your safe. You can store/program up to 50 fingerprints. This enables you to program multiple fingerprints of yours and any other people you authorize.

See your Safewell Team for more information

# APP BASED SAFE

Safewell has developed the ultimate in lock technology, a Wi-Fi enabled safe app for use on your phone!

This is available for Long Gun Safes, Executive Safes and Personal Safes  
Safewell has utilized the Smart Life App

Operate your safe  
with the Smart Life APP

## FEATURES

### One Time Remote Entry Access:

If you are out of town or away from your safe, you can still have someone access your safe if you want them to. Only you can provide that access!

- Individual stands in front of the safe, while you open the Smart Life App
- Have them press a number to send a message to your app
- You then authorize opening - Safe will open remotely!!!

### Create a Temporary Passcode:

You can create and share a temporary passcode to allow a person to access your safe for a specific period of time. This allows you to have a person use or access your safe for a period time, you designate (1 day, 3 days, 1week) you decide the time frame. Passcode is deleted after specified time frame!

### Alarm Function:

Receive alerts for unauthorized attempted access. App provides data and notices of when safe is opened or attempted to open. Records unauthorized entry attempts for an additional level of security awareness.

### Of Course, with all Safewell Safes with Electronic or Biometric Locks; you still enjoy:

- Create your own 3-8 digit personalized digital passcode
- Program your fingerprints (Biometric Locks)
- Comes with an emergency key to access your safe
- Alarm U™ Function
