

toobMAIL^{killer} Technologies

Core Portal Applications (convergent innovation)

A2D (Analog-to-Digital Paperless) -- postal initiative using "smart paper" structured data paperless technology combined with the intelligent mail box "toobMAIL credenza."

HotPaper (HTML5 Invisible Paper) -- "lean back" interactive, personal, portable, collectible, paperless IP communications.

HotSpace (HotPaper + Z-axis) -- uses 3/2G hybrid, 2D/3D graphical visual style, and full 3D.

HS3D Video (HotSpace 3D interactive video format) -- gigabit speed video technology, w/ also 360 features and tools.

VMS (SMS/MMS carrier upgrade / subscription technology) -- rich media / short message / IP telephony application available for smart phone, tablets, and GPS devices, w/ also installed (limited use / lower cost) "fancy" phone option (per handset/plan development *aka* web-connected toob phone); also includes brand signature "audiogram," branded content-based messaging schemes,... and open API.

PaperPlay (HotPaper for mobile) -- message-based, game-based and integrated with VMS; set up your facebook, twitter, or fav social sites to connect you to short-format branded entertainment mashups.

Visual Voice (Visual telephony menus) -- 1st-gen visual-voice meets touchscreen menus, custom inbox panels, real-time answering machine mode, visual voice fonts, conversational bot interface, Talk-to-Yourself message annotation, new PIM apps, and cross-platform VMS connectivity. (Did everyone forget the handset computer is actually still a phone!)

toobMAIL S.P. (Special Post Digital Mail Service) -- encrypted, secure, priority, registered premium pay-per-use, or subscription, mail product facilitating notarized, certified, and/or official document copy, capture, send, and receive transmissions; also interfaces government, public access, and priority enterprise communications -- including U.S. Presidential Address, federal, state and local matters of citizenship, official corporate C-level, NGO/Non-profit -- w/ video and letter formats representing an archive of historic and public record documents -- "*like YouTube for letters!*")
