

A NEW Product from DC Matic Enterprises, Inc.

From the Humvee to an M1 tank...NATO START has the power to get each one started in all types of weather !

www.natostart.com

Features

- Durable-Weatherproof Housing
- Flexible, 4 AWG, Cable
- NATO Approved Male Plug
- LED Voltage Meter
- World Charger (90-240 VAC)
- Connector Protection Boots
- Delivers 1,800 Amps on Demand
- Weight = 29 lbs

Superior Starting Power

The NATO START utilizes ultra-thin battery plate technology that under the harshest of weather conditions will consistently crank out 2-3 times more engine starting power than conventional starter, lights, ignition (SLI) batteries.

A 3-step automatic charging unit quickly and efficiently recharges the NATO START. The unit receives 90-240 VAC by way of interchangeable input power cords (World Charger).

Helpful Diagnostic Tool

After the vehicle is started the on board LED voltage meter will displays the alternator's output.
