

PREMIUM

COMMERCIAL GREEN™

❄️ Ice Melt ❄️

- ❄️ **Effective to temperatures down to -25°F**
- ❄️ **Colored Green to enhance visibility**
- ❄️ **Contains Calcium and Magnesium**
- ❄️ **A high quality ice melter that is fast acting and long lasting**

COMMERCIAL GREEN™ *Ice Melt*

Commercial Green-Premium™ Ice Melt is a proprietary formulation consisting of calcium chloride, magnesium chloride and sodium chloride. Commercial Green-Premium™ Ice Melt is a proven formula using icing chemicals to make Commercial Green-Premium™ an environmentally friendly product.

The green color of Commercial Green-Premium™ Ice Melt ensures that the user does not over-apply or under-apply the product due to a lack of visibility. This ensures that the area is covered correctly, maximizing safety and preventing liability.

Because Commercial Green-Premium™ Ice Melt is a blend that melts more effectively than most other products, less is needed to get the job done, meaning less of an environmental impact.

Because Commercial Green-Premium™ Ice Melt is granulated to optimize melting power, there is less wasted material and no wasted time.

Granules that are too small will start melting quickly, but won't penetrate the ice layer to break it apart. Large granules will often penetrate the ice layer, but won't dissolve efficiently to create a brine layer.

The consistent, medium-sized granules that are used in Commercial Green-Premium™ Ice Melt penetrate the ice surface and maximize ice separation, making the removal process as easy as possible.

Granules that are too small won't penetrate ice

Commercial Green-Premium™ Ice Melt uses consistent granules that optimize melting ability

Granules that are too large won't dissolve properly
