Scope of works.

1, To remove all soil and foliage to relief stress to wall to approx. 12ft back and spread said materials on the land..

2,build new retaining wall to inside in concrete block.

3,take down stone wall and clean off and rebuild to to be safe..

4,approx time to complete 4/5 days to dig and level, approx. 5 days to complete walls retaining and facing...4 men.

Cost £5,700 i would suggest a contingency of 15% in case of unforeseen works which hopefully won't be needed...
