DUNN'S VALVE TESTER INC

Brief History:

Dunn's Valve Testers Inc have been manufacturing Valve Testers since 1978.

We strive to maintain that level of Durability Value and Technology well into the future.

Our Maintenance Program is a key feature in partnering with our clients to help achieve this goal.

Maintenance Program Goal:

Dunn's Valve Testers (DVT) want to partner with our existing customers and help them get the most from their capital investment. We want your DVT machine ready when required. To help you achieve a "Fit for Life" DVT unit we recommend a disciplined schedule 2 visit program every calendar year.

Our structured specific program will provide:

- *DVT Trained Specialized Technician's*
- *Comprehensive Inspection List (i.e. Oil check and Analysis)*
- *Full diagnostic check of the system*
- *Recertification of the machine to hold the name plate pressure at the time frame required*
- *Full interaction with your operating staff to ensure all issues have been addressed*
- *A comprehensive report of findings and recommendations, this report will be stored with the original Project File in DVT office*
- *Any parts changed will only be carried out by with the approval of the client*
- *DVT will always fully test and leave your machine in good working order after every inspection or repair*

PROGRAM IMPLEMENTATION

Call DVT Houston office to setup a meeting with our director to explain the program, and walk through the details.

1. Visitation Schedule
2. Technician Rates
