

# ***Sea Change Teachers-only Trip 2019***

**What is it? A special sailing trip, just for teachers!** Liveboard sailing,

Dates: August 19-22, 2019

Departure: Knife River, Minnesota

navigation, curriculum discussion, school projects, and support from other teachers who want to prepare their students for a changing world.

## **Educational Goals for teachers:**

- 1. To learn climate change science as it relates to the Lake Superior watershed**
- 2. To gain a sense of comradery with other teachers facing similar challenges**
- 3. To develop carbon cutting projects and science curriculum within your educational setting**
- 4. Adventure and inspiration for your students**

## **We will meet these goals through these objectives:**

- Learn climate science as it relates to Lake Superior, northern Minnesota, and the boreal coastline.
- Practice climate science on Lake Superior (water temperature/clarity, data collection with thermoclines, limnology studies, plankton net).
- Develop meaningful lesson plans and carbon-cutting projects.
- Inspire your future students
- Provide Continuing Education credits
- Have fun and learn to sail!
