ECONOMY ADDS ONLY 175K JOBS IN APRIL; UNEMPLOYMENT RISES TO 3.9%

The US economy added a mere 175,000 jobs in April, signaling slower growth in the labor market. It marked the worst month for job creation since October. The unemployment rate, meanwhile, inched higher to 3.9% against expectations that it would hold steady at 3.8%.

Wage growth was also more subdued last month, with average hourly earnings – a key measure of inflation – rising 0.2%, less than expected. On an annual basis, wages increased 3.9% in April.

The surprisingly weak report paints a picture of a job market that is beginning to sputter as the result of the Federal Reserve's aggressive interest-rate hike campaign, and boosts the odds of rate cuts sooner rather than later.

Following a steady stream of less-than-desirable inflation data in recent months, while it may not put a June rate cut back on the table, it will increase the odds that the Fed will be able to get in at least one cut this year.

Fed policymakers voted Wednesday to hold interest rates steady at the highest level since 2001 and signaled they will remain in wait-and-see mode on rate reductions after a string of hot inflation reports at the beginning of the year.

STRATEGICALLY FOR CREDIT UNIONS

FRB Charman Powell more than ruled out the likelihood of additional rate hikes this year, and signaled the Fed is ready to act should there be an "unexpected weakening" in the labor market.

"It would have to be meaningful and get our attention and lead us to think that the labor market was really significantly weakening for us to want to react to it," he added. "A couple of tenths [percentage points] in the unemployment rate would probably not do that."

The labor market remains the key pillar of resilience for the U.S. economy, but the April jobs report confirms that a broad cooldown in labor market conditions is underway. Our outlook calls for a softer labor market conditions with cooler hiring, localized layoffs, and a continued moderation in wage growth.

Though layoffs remain at low levels, companies have been announcing more job cuts recently, mostly across technology and media. In total, 1.77 million Americans were collecting jobless benefits during the week that ended April 20.

The length of the average workweek fell last month, to 34.3 from 34.4. The underemployment rate, which includes the unemployed and those marginally attached to the workforce, rose to 7.4%.

In a potential sign to come, consumer confidence fell sharply in April as inflation worries and a downbeat outlook on the job market pushed optimism to its lowest level since 2022.
