## ACKNOWLEDGEMENT

When a patient seeks Chiropractic healthcare and Elk Ridge Chiropractic & Wellness Center accepts a patient for such care, it is essential for both parties to be working towards the same objective.

Chiropractic has only one goal. It is important that each patient understands both the objective and the method that will be used to obtain it. This will prevent any confusion or disappointment.

**Vertebral Subluxation:** A misalignment of one or more of the 24 vertebra in the spinal column, which causes alterations of nerve function and interference to the transmission of mental impulses, resulting in lessening of the body's innate (in born) ability to express its maximum health potential (reduce the body's function).

**Adjustment:** An adjustment is the specific application of forces to facilitate the body's correction of vertebral subluxation. Our Chiropractic method of correction is by specific adjustments of the spine.

**Health:** A state of physical, mental, and social well-being, not merely the absence of disease or infirmity.

We primarily treat and diagnose neuromusculoskeletal disorders. If during the course of Chiropractic spinal examination, we encounter non-Chiropractic unusual findings, we will advise you. If you desire advice, diagnosis, or treatment for those non-Chiropractic unusual findings, we will recommend that you seek the services of another healthcare provider. Though we work to treat and eliminate the primary complaint, we cannot guarantee outcomes or results.

I (**Print Your Name**) \_\_\_\_\_ have read and fully understand the above statements. All questions regarding the Doctor's objectives pertaining to my care, in this office, have been answered to my complete satisfaction. I therefore consent to Chiropractic care and treatment on this basis.
