ISSUE NO 9

FEBRUARY 2020

FROM THE DESK OF: MARK SMITH, OWNER

## Are you ready for Spring?

Mother Nature just cannot seem to make her mind up this winter. With above average temperatures and mild snow & ice accumulations we just have not had the winter wonderland we are used to. With the lack of snow to move and ice to manage we have been preparing for the new season by focusing on training, safety, and service renewals.

## This Month's Reminder

We are diligently working on contacting each client (excludes some auto-renew clients) via phone, email, and mail to renew services for this upcoming season. Please remember once contacted for renewal, to review and respond promptly so we can provide efficient scheduling for all of our customers.

## Workshops & Tradeshows

The information gained and relationships built from workshops and tradeshows are invaluable learning experiences for us to better serve our customers.

The winter workshop (pictured above) was an incredible networking experience; packed full of information that has us rejuvenated for seasons to come.

Attending the Great Lakes Trade Expo, just days ago, were many of our managers and division foremen. The tradeshow was a fun process for our team to see new innovations in technology and equipment, increase brand awareness, network with vendors and industry leaders, and the chance to learn more about our industry.

## Our Mission

Our goal is to improve the aesthetics of every property we service while strengthening our relationships with team members, clients, vendors, and our community.

## Our Values

We take P.R.I.D.E. in all aspects of our work.

- Positive work environment.
- Responsible for our commitments.
- Interpersonal with a high level of communication.
- Detail oriented to make success easier.
- Excellence in our work quality and customer service.

## Need a jump start?

Do these dreary winter days have anyone else thinking of sunny days and warmer weather? Start planning now, spruce up that overgrown landscape, add some character to the boring walkway, or start designing that long awaited outdoor living area now so you can enjoy it this summer!

## 3D Designs

With the proper measurements and photos of your property (project area) we can produce a 3D design to give you a vision of your next landscape project.
