Our Priority at the Barnstable Comedy Club is the Health and Safety of our Patrons and Volunteers.

While the current risk level of COVID-19 (Coronavirus) on the Cape is low, we wanted to share the steps we’re taking here at the BCC and the precautions we, as a community, should take to help keep each other healthy.

The Barnstable Comedy Club continues to be open for business as usual, with some additional precautionary measures in place.

We ask that our patrons and volunteers adhere to the following guidelines and be aware of the steps that we are taking to ensure health and safety for everyone:

If you have a fever, cough, sore throat or any flu-like symptoms, please do not come into the Barnstable Comedy Club.

We are increasing the frequency of cleaning common areas and providing disinfecting and hygienic materials for volunteers and patrons.

We’ve reminded our volunteers to follow standard precautions, including to frequently wash hands, to avoid face touching, cover sneezes and coughs and to stay home if they feel ill. We ask our patrons to do the same.

We will continue to monitor and follow guidance provided by the Centers for Disease Control and Prevention, as well as local and state public health authorities and will provide updates via email, our website, and social media should our plans change.

Thank you for your support and cooperation.
