Prime	8.50%	8.50%	8.50%	8.25%	0.00%	0.25%	5.25%	 <p>The chart displays the yield curve assessment from 0% to 6.00% on the y-axis and maturity from 0 to 30 years on the x-axis. It compares the current yield curve (solid blue line) with the beginning of the year (solid red line), last year (solid green line), and two historical points: Nov 2018 (dashed black line) and Apr 2020 (dashed red line). The current curve shows a relatively flat, upward-sloping structure, similar to the beginning of the year but higher overall. The 2018 and 2020 curves show a more pronounced downward slope, indicating an inverted yield curve.</p>

ECONOMIC UPDATE AND ANALYSIS	NONFARM PAYROLL INCREASES BY 206K IN JUNE; JOBLESS RATE RISES TO TWO YEAR HIGH		Key Economic Indicators for Banks, Thrifts & Credit Unions-				
	<p>Employers added 206,000 nonfarm payroll jobs in June, while in a separate survey, the nation's unemployment rate rose to 4.1%, up from 4% in the month prior and the highest reading in almost three years.</p> <p>June's job additions were a slight decline from May, which saw job gains revised downward to 218,000 from the 272,000 initially reported. Total revisions for April and May showed the US economy added 111,000 fewer jobs than previously reported.</p> <p>Today's employment report may firm up slight expectations of a rate cut before the end of the year. Unemployment claims are rising and the unemployment rate is at its highest level in more than two years while the pace of inflation is falling. But policy-makers continue to tightrope the line between cutting rates too soon that it may increase the pace of inflation versus waiting too late that it challenge future growth.</p> <p>Wage growth, an important measure for gauging inflation pressures, slowed to 3.9% year over year versus last month's 4.1%. This compares with the latest 3.4% reported pace in consumer inflation.</p> <p>Meanwhile, the labor force participation rate picked up to 62.6% from 62.5% in May.</p>			LATEST	CURRENT	PREV

STRATEGICALLY FOR CREDIT UNIONS

The labor market has remained surprisingly resilient as the Federal Reserve maintains two-decade high interest rates as part of its effort to bring inflation back down to target.

After peaking at a 40-year high of 9.1 percent in June 2022, inflation has cooled significantly, falling to 3.3 percent as of May. However, it remains stubbornly higher than the central bank would like, dashing hopes of imminent rate cuts.

Fed policy-makers have maintained in recent months that the Fed needs to see better inflation readings before beginning to ease interest rates from their current range of between 5.25 percent and 5.5 percent. Chairman Powell cited, "We want to be more confident that inflation is moving sustainably down toward 2 percent before we start the process of reducing how tight our policy is, of loosening policy."

The 525 basis points worth of rate hikes by the Federal Reserve since 2022 as well as the exhaustion of excess savings accumulated during the COVID-19 pandemic are eroding demand for labor, goods and services.

The minutes of the central bank's June 11-12 meeting, which were published on Wednesday, showed policymakers acknowledged the economy appeared to be slowing and that "price pressures were diminishing."

While we have increased the odds for a rate cut in September, there remain many variables that could lower those chances.
