

Classroom Videos Policy

Classroom security tapes are for the purpose of assisting the center and those in authority in making sure children are safe.

Tapes are viewed by the administration as needed and for continuous support of the center's staff, to monitor successes and progress, for staff evaluation. Tapes are also viewed by administration when there is need to solve a problem and a need for data that might be supplied thru video.

For safety of all children, videos are not accessible to parents or other family members.
