17 October 2025

NEARLY 1 in 5 HOMES SLASHED PRICES LAST MONTH DESPITE LOWER MORTGAGE **RATES**

Nearly 20% of home listings reduced their prices last month in what might be another sign that the housing market continues to slow. According to the September housing trends report, buyers still have the upper hand in the current market, especially as we approach the "best time to buy", but that power depends on where you live and how much you're willing to pay for a home.

Price reductions are more common at the lower end of the market, while higher-priced sellers are more likely to hold firm. That helps explain why median prices nationally and in many metropolitan areas look steady even as buyers at more affordable price points are seeing more room to negotiate.

Buyers had more homes to choose from in September: Active listings are up 17% over last year. Nationwide, homes for sale topped 1 million for the fifth consecutive month. Homes spent longer on the market for the 18th straight month, with the typical home taking 62 days to sell.

The national median list price remained steady at \$425,000, but dropped 3.6% in the West. The number of actively listed homes is up 17% compared to the same time last year, marking the 23rd consecutive month of year-on-year inventory gains.

STRATEGICALLY SPEAKING

The average rate on a 30-year U.S. mortgage ticked up for the second straight week, but they're still at their lowest in months. The average long-term mortgage rate rose this week to 6.44% from 6.34% last week, mortgage buyer Freddie Mac said Thursday (Oct. 2). A year ago, the rate averaged 6.12%.

Buyers had more homes to choose from in September: Active listings are up 17% over last year. Nationwide, homes for sale topped 1 million for the fifth consecutive month.

The United States is short between 3.2 million and 5.5 million homes, Freddie Mac puts the gap at roughly 3.8 million units, while the National Low Income Housing Coalition reports a shortage of more than 7 million affordable and accessible units. This gap between supply and demand is the very reason for rising home prices.

Studies from the National Association of Home Builders show that federal, state and local regulations account for nearly 24% of the price of a new single-family home and more than 40% of the cost of new multifamily housing.

In each study, there's no question that housing costs are crushing families.

THE ECONOMY AND STRATEGIC ASSESSMENT

CURRENT PROFILE

Growth Outlook

Slower pace nationally with pockets of stronger demand and spending

Inflation

More members living paycheck -to-paycheck. This dilutes purchasing power and discretionary spending

Household Wealth

Boosted by improvement in capital market, home values and stable wage growth

IMPACT ON OUTLOOK

Growth

Local demand should be sufficient to satisfy pending loan and deposit growth

Inflation and Household Wealth

Expect pace of inflation to range between 2.3% to 2.9% .. Pace of home prices should slow ... Expect pockets of course correction in credit markets

Credit Risk and Liquidity

Two biggest concerns mounting delinquency & cash flow mismatch.
Delinquency doubing for 3rd straigh month.

IMPACT ON DEMAND

Growth and Liquidity

Volatility in core deposits remains thus creating unable share growth and potential mismatch between loan/share growth capacity

Credit Demand

Slight fluctuation between A- and C-quality Ioan applications. Pressure to compromise U/W should be avoided

Share Growth

Volatile core deposits and organic growth will determine permissible loan growth

ENTERPRISE RISK EXPOSURE AND STRATEGIC ASSESSMENT

ASSET & NET WORTH

Growth & Capitalization

Efforts should focus on net worth with growth tied to retaining a well-capitalized net worth (>7%)

Balance Sheet Allocation

Must have limited complexity but capable to adjust due to economic, risk pressure and reallocation

Liquidity

Monitor mismatch between loan and share growth .. Core deposit volatility continues in market ... Loan growth is dependent on share growth

RISK EXPOSURES

Enterprise Risk

To garner best balance between financial and member service, the focus must take into account all risk exposures

Interest Rate Risk

Retain risk-to-ST earnings no greater than -10% to -12% given +/-100bp shift and risk-to-LT earnings no greater than -30% given +/-300bp shift

Liquidity Risk

Retail surplus-to-assets no less than 9%; ST Funding no less than 12%

CREDIT MITIGATION

Credit Risk Exposure

High priority in 2025 ... 87% of new origination must be B+-quality or better ...

Allocation and Average Life

Prime quality must be no less than 92% of portfolio .. Average life must range between 2.7 and 3.1 years

Recommend risk classifications of A+ (730+), A (680-729), B (640-679), C (620-639)

Loss exposure of Sub-prime may not dilute net worth below 7%

INTEREST RATES, PRICING SPREADS AND STRATEGIC ASSESSMENT

MARKET RATES

Benchmarks

Downward pressure on most treasury benchmarks with greater volatility on the long-end of the curve

Market Rates

Consumer rates will not experience as great a downward pressure as benchmarks... potential to 25 to 30 bp decline in vehicle loan rates

Greater volatility in mortgage rates with range between 6% to 7%

No change in core deposit rates but lower term CD rates

PRICING SPREADS

Effect on Pricing Spreads

Any downward shift in asset rates will be slower than benchmarks therefore relative value of credit -risk asset should increase.

No exposure in core deposit rates will see increase in relative value of core shares ... Improved liquidity profile and downward pressure on term rates should narrow funding spreads and potentially minimize the impact and need of promotional term CDs.

Largest impact from downward pressure comes from overnight cash

ALLOCATION & RETURN

Risk Allocation Metrics

Surplus-to-Assets: >9% ST Funds-to-Assets: >12%

Vehicle-to-Loans: >60%<75%
RE Loans-to-Loans: >25%<50%
RE Loans-to-Net Worth: <275%

Core-to-Shares: >75%
Term-to-Shares: <20%
"Misery" Index: <0.80%

Outlook on Return

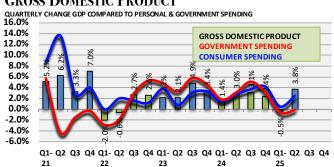

Marginal loan rates still higher than portfolio yields so even fewer originations might increase revenue
