Beverly Hills Plastic Surgery, Inc.
Dr. Gabriel Chiu
The Best of Everything in
Challenging Times!

The first thing I noticed at Beverly Hills Plastic Surgery, in Beverly Hills, is that everything was exquisite, down to the smallest detail. The Chanel-inspired suite, complete with crystal chandeliers and white marble floors, has such a sophisticated and calming feel. I was gracefully greeted by Christine Chiu, Managing Partner and wife of Dr. Gabriel Chiu. Christine loves all things Chanel, and the Chius' dedication to timeless beauty is as evident in décor as it is in Dr. Chiu's surgical results. "Our classic-modern facility is compromised of a sensational Skinceuticals lounge, private VIP reception for our most discerning

clientele and four beautiful exam rooms. We operate on paperless and wireless systems for unparalleled efficiency and patient confidentiality. For enhanced patient comfort, we offer state-of-the-art audio, visual, and security systems," Christine explained.

The medical suite is gorgeous...more like a home than an office. Clients are treated to pomegranate and blueberry tea, Belgian chocolates, sugar-free Madagascar vanilla macarons, and there is even a variety of activities for children such as movies, games, and books. Gummy Bears, Goldfish crackers, and apple juice are always well-stocked for kids who accompany their parents! During treatments for facial fillers, patients are offered gourmet dried fruits and delicious refreshments to stay hydrated.

that patient's specific needs. Since creating exciting and life changing experiences is what BHPS is known for, I decided to treat myself to something special. I was amazed at the expertise of Dr. Chiu, and how he used just a small amount of Botox to give my

results and thousands of satisfied patients. Though delivering exception results in all facets of plastic and cosmetic surgery, Dr. Chiu is renowned for flawless body contouring, breast augmentation and facial procedures.

BHPS knows the importance of people looking and feeling great—especially in challenging economic times. With this in mind, their Budget-Friendly beauty treatments help even the 'Rich and Famous' improve looks without spending a fortune. Dr. Chiu, while maintaining his advanced and acclaimed surgical procedures, indulges his clients' beauty needs with guilt-free, recession-friendly and non-surgical beauty alternatives: Radiesse rejuvenated hands, Medical Grade Compression Garments, non-surgical lifts, a non-surgical nose procedure, "Botox Lift" and "Botox & Peel".

"In this economy, even the wealthiest women have to decide between that coveted Hermes purse or looking the age she feels. Of course, I tell them they can have the best of both worlds by opting for a Chanel and seeing me for a recession-friendly treatment," Dr. Chiu said with a gleam in his eye.

I was escorted into a beautiful room to meet with Dr. Chiu, who not surprisingly, was wearing an YSL suit under his doctor's coat! He explained the company's goal of enhancing a patient's beauty by utilizing the most-natural, minimally-invasive and painless techniques. Dr. Chiu also stressed that every treatment and experience is customized to

Dr. Chiu and Christine Chiu

eyes a very natural and "refreshed" lift. I had no idea that could even be done. I was thrilled with the results!

Dr. Chiu believes in building long-term relationships with his patients, stating that *follow up care* is key. Many patients stay on Rodeo Drive post surgery, where he visits them throughout their healing process. Dr. Chiu's warm personality and passion for perfection makes him an ideal plastic surgeon for patients of all ages. His diligent attention to detail is evident in his unmatched surgical
