

# The Society for Pelvic Research

## **Trainee membership is open!**

We are looking for students, residents, fellows and post-docs interested in normal physiology, diseases and treatments of:

- **Lower Urinary Tract**
- **Distal Gut**
- **Genital System**
- **Pelvic Floor**

Our mission is to promote the highest standards of basic/translational science research directed toward understanding benign pelvic visceral and musculoskeletal function and dysfunction through education, interaction, and advocacy.

Benefits include:

- Cross-training and collaboration between multiple fields of study
- Networking opportunities with leaders in pelvic research
- Active and meaningful participation in a professional society
- Formation of enduring relationships and collaborations with your peers
- Annual conferences to present your research and share ideas
