This list of crowdfunding platforms does not purport to be complete, but it includes dozens of crowdfunding sites you can consider for your campaign. Very useful resource i find here. Nice Collection.
 I suggest you to take a look at what we have created with FundraisingScript
 (www.fundraisingscript.com). We give the possibility to the people to create their own white label
 based crowdfunding platform in few minutes.

Our infrastructure includes the platform on a SaaS model that provides a SaaS to clients who
 would like to build a scalable crowdfunding platform. Using our SaaS individuals, organizations
 and companies can build and manage unique crowdfunding websites with little or no web
 development experience. The tools allow you to fully customize your site as per your needs &
 requirements.

I would like to also add Thrinacia to the list. Thrinacia is crowdfunding engine, it is white label and
 allows for people to run their own crowdfunding website within minutes. Once deployed, it can be
 used with relative ease and further customizations can be done to meet specific needs. You can
 learn more at: <https://www.thrinacia.com/>
