

What Are The Benefits?

Is Mom getting more and more withdrawn?

Is Dad having difficulty coping with the loneliness since the loss of his spouse?

Do they claim they're just not worthwhile anymore?

Adult day Health care is a planned program of activities for individuals 18 years or older who require supportive care during the day but can return home in the evenings. The purpose of the social and health-related activities are:

- **To provide mental and social stimulation**
- **To give primary caregiver a needed break to rest or work without worry**
- **To prevent, or at least delay, the caregiver having to resort to nursing home placement**

A Mission OF CARING

Lavender Meadows is proud to bring you the best healthcare facility that focuses on the health and wellness of our participants. We promote optimal health and mental well-being for our participants. We comply with their physician orders, treatment plans and offer support for the caregiver, in a compassionate, enjoyable setting with activities and programs for productivity, self-worth, and socialization which are essential in building self-esteem.
