COURSE OVERVIEW

The 64th Annual World Congress of the International Practice Guidelines 2023 is a multidisciplinary meeting for cardiologists, cardiovascular surgeons, radiologists, endovascular specialists, primary care providers, podiatrists, women's health physicians, physician assistants, general and family medicine residents, technicians and providers-in-training (including NP/PA students) sponsored by the Midwest Heart Foundation jointly with the International Chapter of the American College of Cardiology. The course will give a comprehensive update in various areas of cardiology including coronary, structural, peripheral vascular, imaging, interventional radiology, neurology/neurocardiology. An international invited faculty will share state-of-the-art knowledge and a practical approach. Registrants will attend the Scientific Sessions from Friday to Saturday September 16th, 2023 at the Genesis Heart Institute, 1236 E. Rusholme Road, Chicago, IL.

LEARNING OBJECTIVES

The scientific sessions will provide attendees with new aspects of interventional and general cardiology, surgery, imaging and women in cardiology. Upon completion, attendees should be able to:

● Conference Objectives for Tuesday, September 12, 2023

- Discuss Empowering the Women Leaders of the Field
- Identify Lack of Diversity in Clinical Trials and its Impact on Conclusions.
- Describe Venous Disease in Women: Epidemiology and Pathophysiology
- Review Spontaneous Coronary Artery Dissection: A Review
- Discuss the Gold Standard Approach in Bypass Surgery
- Discuss the Road to Quality and Safety in Cardiology

● Conference Objectives for Wednesday, September 13, 2023

- Review Pharmacologic Management of Heart Failure
- Review Exercise Physiology and its Impact on Heart Health
- Discuss How to Optimize Revascularization in Heart Failure
- Define Pericarditis: Update on Treatment Modalities
- Recognize the Various Tools of Peripheral Artery Disease
- Review the Basics of Wound Management: Debridement, Medical/Surgical Therapies.
- Discuss Atherosclerosis and Low-Density Lipoprotein Management
- Discuss Optimization of Imaging in Echocardiography
- Review CTA Cardiac Applications.
- Recognize the Role of Precision Medicine in Endovascular Interventions.
- Review Imaging in Endovascular Therapies of Venous Insufficiency.
- Review Radial Access Applications and Complications
- Review Diabetes and the Heart and Update on Management
- Cardiovascular Complications.
- Recognize When and How to Treat Coronary Thrombosis

● Conference Objectives for September 14,15,16, 2023

- Describe and Apply the Value of an Integrated Treatment of Cardiac and Vascular Diseases
- Assess and Differentiate Between Competing
- Choose When and How to Appropriately Apply Non-Interventional Procedures in the Treatment
- Describe New Developments and Techniques in Management, and Treatment of Cardiac, Pericardial Disorders to Make Improved Patient Care Decisions
- Enhance Knowledge in the Practice of Treatment
- Identify and Explore New Research Problems

All presentations will have an educational purpose while providing a balanced view of diagnosis and therapeutic options. This will be followed by constructive debate. These objectives will be achieved through national and international invited guest lecturers, special symposia, oral and poster presentation and e-learning highlighting the most challenging and complex topics and procedures performed in interventional medicine.
