

PLT is a modern Pick Light Tower for Horizontal Carousel Applications. The PLT displays information including carousel status, carousel carrier number, transaction quantity and also shows the transaction location on a flexible grid display that matches the actual picking containers. The Tower is available in various heights from 8..12ft and is filled with full color LEDs from top to bottom for complete flexibility to match your shelving on the carousels.

The PLT interfaces over WiFi and is easily configured via an Android mobile app with BlueTooth

The PLT works in tandem with the Robey Controls machine controls and has full support when used with our PartPic Inventory Management software solution.

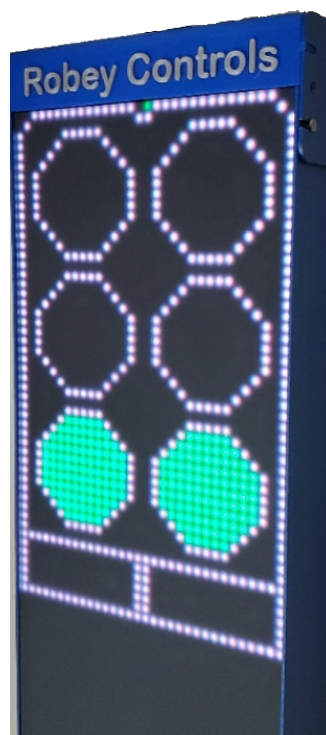

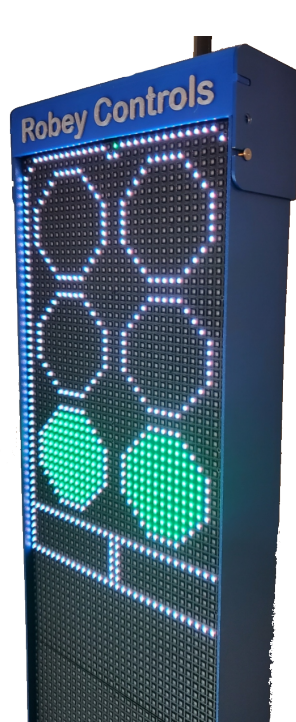

Machine operating status is shown in the 'traffic light' information at the head of the PLT

When used with our PartPic Inventory Management software, the system will also indicate the unit of measure (e.g. Bag) and the transaction mode (+=Storing, -=Picking, ?=Counting, etc)

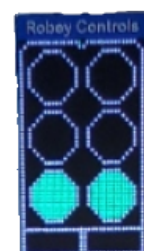

The PLT can be delivered with or without the optional acrylic cover:

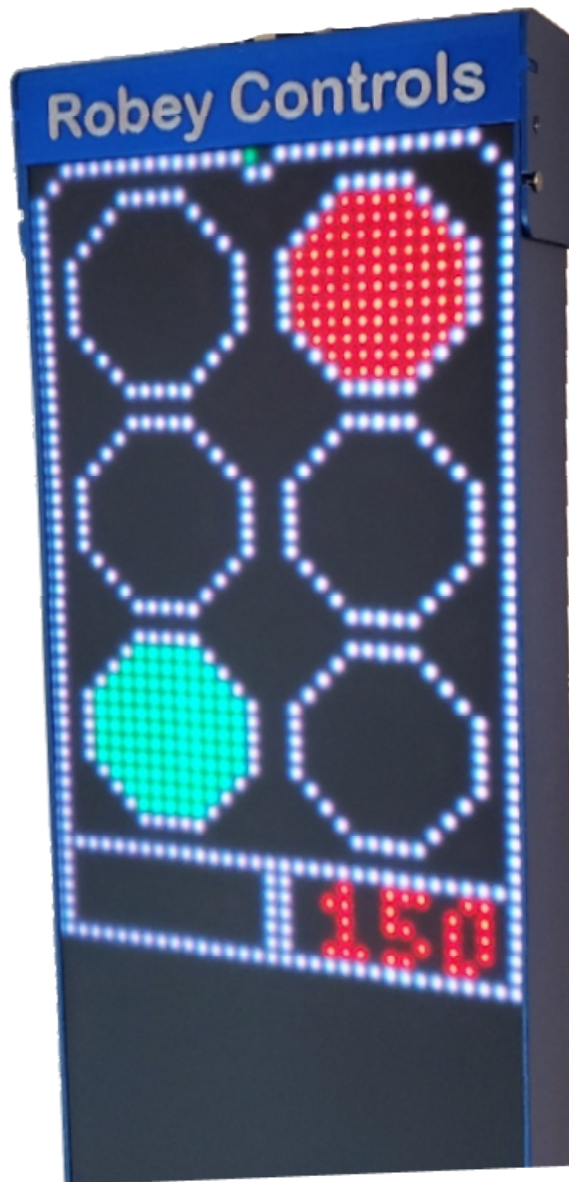

The Black Acrylic LED cover gives a beautiful contrast to the face of the PLT and makes it easier for cleaning but does dim the LED brightness a bit.

Target and actual carrier numbers are shown at the foot of the display so the operator can be sure that he is accessing the correct bin on the carousel.

Features & Benefits

- Modern Full color LED design
- Picking grid display
- Units of measure
- Shelf level adjustability +/-4mm
- Sleek design
- WiFi interface
- BlueTooth setup with free Mobile app
