Applied Petrographic Services, Inc. (APS) is a full-service petrographic sample preparation laboratory equipped with state-of-the-art machines, microscopes, and facilities. Our primary goal is complete customer satisfaction through **quality services**, the **fastest turnaround**, and the **most competitive prices** in the industry. Besides our regular thin sections, polished sections, grain mounts, stained sections, and a variety of optional services on small (27 × 46 mm), large (50 × 75 mm) and circular (~25 mm) size samples, we can handle any difficult job that requires special care and handling in sample preparation.

Our daily operation is smooth and automated with numerous state-of-the-art sectioning, impregnation, grinding, polishing, and single plus multi-sample thin-sectioning equipments from Buehler, Logitech, Leco, Struers, Microtec, Lapmaster, Allied High Tech, MK Diamond, Hillquest, Ingram-Ward, and others. Added to this extensive line of fine equipments is our decades of experience in handling all types of samples from natural and synthetic rocks, minerals, meteorites, fossils, soil, coal, to cement, aggregate, concrete, masonry, bituminous materials, to metals, plastics, and various other materials of geological, building and construction, metallurgical, and material science fields. Our clients come from broad sectors of academic, commercial, and industrial fields.

Skeptical?

Because of our competitive price, trying us once to experience our quality services in the fastest turnaround time in the middle of your rush project may be worth your every penny.

Want to know more?

Please visit us in the net at **www.petrography.net** where you will find a wealth of information about our facilities, services, products, technical notes, and downloadable price lists and order forms. Feel free to give us a call at **1-800-899-0522** with your needs. It will be a pleasure to provide our services to you.
