

Three Steps to Readiness with Disaster Readiness Solutions

For the Small to Mid-size Business (SMB), the words may change; but the message stays the same.

"93% of companies that lost access to their data for 10 days or more due to a disaster filed for bankruptcy within one year" - National Archives & Records Administration in Washington

"Fewer than 10% of SMBs have business recovery plans" – Gartner Research

"Three Out of Four Companies at Risk, Fail to Prepare for Disaster Recovery" – businesswire.com

"SMBs are at risk, they are still not making disaster preparedness a priority until they experience a disaster or data loss" – Symantec

For the SMB, there are a number of answers; but what is the 'right' answer for your business?

Disaster Readiness Solutions (DRS) with its Three Steps to Readiness will work with you to find your right answer for the cost you can afford; ***your solution, your price.***

The DRS Three Steps to Readiness – Everything Starts with a Plan

Step 1. **Take the DR Survey** - Find out where you are at.

Step 2. **Enterprise Readiness Assessment** - Identify what needs to be done.

Step 3. **DRS-In-A-Box** – Make your changes with the affordable, scalable Business Disaster Recovery solution that grows and evolves as your program matures.

Additional Product and Services available through DRS

- HIPAA-Compliant Cloud Backup Services for Physical and Virtual Server Backup and Recovery.
- Internet and Private Network Transport Services across Blended Carriers to improve performance and minimize outages.
- Office Mobility and Virtualization (Workstations, Phones/Faxes) for when your office is not accessible.
- Project Management and Business Consulting Services.

Contact **Disaster Readiness Solutions** to learn more about services available or to schedule an appointment.
