# Permit Fee Calculator for Fullvar Permit Type

**Ordinance 2014-01 -- Exhibit "A" -- Effective May 1, 2014  
As adopted by the Board of Trustees**

**For Additions, New Construction, Remodels:** The permit fee is primarily based upon square feet (see description for included and additional fees). One permit can have multiple types (e.g. both an addition and remodel). For an addition with minor remodeling in some areas of the building, the building commissioner has the option to price that remodeling individually and not by square foot if it will result in a lower permit fee. One re-submittal is included in the and any further ones will be added to the fee.
