

# SmartSpark Coils for LS GM Gen III Engines

## SmartSpark Coils for GM LS2, LS3, and LS7 Engines

They are a direct bolt on performance upgrade. They will produce a hotter spark to burn the fuel more efficiently in the engines cylinders producing more power. Available individually or eight pack.

These coils feature high temperature epoxy filled housings that resist shock and vibrations using the latest coil technology.

- Manufactured and designed using the latest technology
- Molded using high dielectric strength material
- Designed to work with SmartSpark LS Ignitions or competitive systems
- Improved Throttle Response
- Backed with a one year limited warranty
