I felt better to upload the images in the 3 rd image slider – a new image slider – right now. The shit quarters could not possibly fuck themselves any harder just now, and bring fatal fucks in the middle of

getting fatally fucked for fedex. The shit quarters are the coalitions of fuck and shit traitors. I will have the rest of this image slider and link to the pdf not later than hours, and will show what happened. This page will be sorted better accordingly. Thank you

Extremely important pictures to download: In looking for a copy of

certain deleted pictures of the punk shit traitors from Atlanta, I found a few unrelated extremely important pictures. I published them with directly related pictures in a new image slider. It is the 6th down from here. The linked pdf contains only the images. It is 17 pages long. It is very important to download the pdf or the images the earliest. I will say more shortly. Thank you

I published 2 new image sliders, the 4th and 7th down from here. Their pdf will be linked soon. I added new images to the currently 5th image slider. The caption of one of the image is linked to its pdf. This image slider – the city drowned in the poisonous shit of high treasons – has now two separate linked pdfs at this time. Each linked to the caption of their own images. They will be combined later. Among other things, I will be working on a page describing my own situation which is extremely urgent. Thank you
