FW1201	Carrier Supra Panel

## REEFER CHUTES

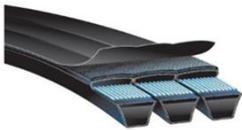

PART #	ITEM
FW1200	Reefer Trailer Chutes

Whether you are a trailer dealership, repair shop, or fleet, FleetWide is pleased to offer you high quality reefer chutes at a competitive price.

Made from 12oz, rip stop polyethylene  
 We know the abuse that trailers take on a daily basis, this is why quality comes first. Universal fit for Carrier or Thermo king reefers.

The Chute design provides uniform temperature throughout the entire trailer by using an adapter and chutes that move the air flow from the reefer unit to the rear of the trailer. Without these Chutes, the cold air blowing from the reefer unit would not reach the back of the trailer before heating up.  
 Pop up chutes also available upon request.

## TK & CARRIER COMPATIBLE BELTS

Operational and performance requirements of over-the-road temperature control units are unlike any other. These belts are designed and built especially for your system and its specific temperature requirements – you can depend on the belt to withstand the heat specific to your application. Premium materials mean superior temperature and chemical resistance, resulting in longer belt life.  
 When you our aftermarket belts, you can be confident of fitting the best performing product for your application to protect your investment.

We carry a wide variety of belts for:  
 Engines, fans, alternators, water pumps, compressor drive, engine idlers, & Fan Drives  
 Any time you need to change a single belt on a unit, always closely inspect all of the other belts and their condition. Remember - the entire drive system is only as good as the weakest link. Please provide OEM part number when placing you order.

## REEFER FUEL TANK

PART #	ITEM
FW205	Reefer Fuel Tank 50 Gallon 22" x 30" Aluminum

Aluminium diesel fuel tanks are purposely designed for trailer refrigeration systems. They are exceptionally robust, light-weight and have additional corrosion resistance associated with aluminium. Ideal for the most extreme environments, they are configured to integrate seamlessly with any fuel tank accessories for added security and fuel level monitoring. The new tank has been ergonomically designed to facilitate easier accessibility to reduce installation times. Other sizes are available. Please call for information.
