

Our Vision, Our Mission

Finding My Way Books promote the access and participation of children with disabilities within schools and communities. Each book offers a window for all children to look through and learn how children with disabilities can live inclusively. Also, each book offers a mirror to children with disabilities to see themselves participating in activities that enhance their lives.

Supporting Teachers, Supporting Inclusion

Dear Educator,

I hope that you enjoy the Finding My Way Series as much as I do! I know that students will benefit by reading about other children doing remarkable things. This series demonstrates that we can all accomplish whatever it is we set our minds to doing. Nothing is impossible if we dream big!

It is often difficult to find materials that support our favorite books. I created this reproducible, easy to use Activity Guide as a way to give educators opportunities to enrich their students understanding of the stories and make connections with the characters; their determination and accomplishments.

This curriculum was developed using nine tasks that complement each of the six stories in the series as they build important literacy and math skills.

Language Arts Skills:

- Word Work

- Vocabulary Acquisition

- Comprehension Strategies: compare and contrast, inferencing, recalling information, retelling and sequencing events

- Writing narrative, informational and persuasive accounts

Math Skills:

- Counting and cardinality

- Operations and algebraic thinking

- Numbers and operations in base ten

- Geometry

- Real-world problem solving

I hope you enjoy using these products as much as I have enjoyed creating them.

Crystal Uyhelji, MS, Ed
