

# Walking FARM App

By  CHICAGO TITLE

## Walking a FARM has never been this easy!

With Chicago Title's Walking FARM mobile application, you no longer have to order a walking farm report from your title company. you will have all the information at your fingertips. Simply select the area you want to walk by drawing a line using your FINGERTIP. When you are satisfied with your selection, the App will return a list of properties in walking order. There are two ways to view your FARM, either in a List View or in the Single Property View format. The Interactive Single Property View allows you to add comments to each property record. When you're ready to walk to the next property, simply use your FINGERTIP to swipe the screen to the next property in your Walking FARM. The List View format displays multiple properties on a page using our scrolling feature. For a demo of this amazing app, please contact us today!
