FAUX WOOD
BLINDS

WHY OUR FAUX WOOD BLINDS?

- 2" and 2 ½" slat sizes accommodate any window size; 20 great color choices
- Constructed of durable, improved temperature performance materials for longer life
- Premium Grain, our exquisite decorative collection, features a beautiful wood grain print
- Dependable slats won't crack, chip or fade
- Cordless Lift & Lock™, cordless lift and RemoteTilt motorization options available
- Wider widths than many other faux wood programs
- Heavy-duty slim-design headrail and crash-proof cordlock provide smooth, easy operation
- Innovative, magnetic valance attachment system is secure, easy to install, and conveniently adjustable
- Valance returns are glued and finished by hand for a refined look and time-saving installation
- Limited Lifetime Warranty for customer satisfaction

Let's go window shopping.

FAUX WOOD BLINDS BY ALTA

REMOTETILT		STANDARD VALANCE		CRESCENT VALANCE	

FEATURES	BENEFITS
SLAT SIZES AND STYLES	
2"	A standard slat size that's perfect for any size window.
2 ½"	Larger scale offers optimal view-through and a more dramatic look. An economical alternative to shutters.
Faux Wood	Offered in whites, neutrals and wood tones.
Premium Grain	Exquisite decorative collection features a beautiful wood grain print.
VALANCE PROGRAM	
Valance Styles	Two style choices complement any decor, from traditional to sleek and contemporary. Spliced valance option up to 168".
Ⓐ **Glued Returns**	Returns are glued and finished by hand for a perfected look and time-saving installation.
Ⓐ **Magnetic Valance Clips**	Innovative, proprietary magnetic clips make installation quick, easy and secure while also allowing for custom height and projection adjustments. Installers love them!
CONTROL OPTIONS	
Cord Tilt/Lift	Superior tilting mechanism is designed for smooth, long-lasting operation. Slats tilt open or closed by pulling on the cord tilt. Lift cord features break-away stop ball.
Wand Tilt	Wand tilts the slats open or closed with a simple twist. Available in both slat sizes. Meets safety certification only when used with Cordless Lift & Lock.
Ⓐ **Cordless Lift & Lock** CERTIFIED BEST FOR KIDS	Press a button on the aluminum bottomrail to lift and lower the blind; release the button to lock blind into place. No lift cords enhances child safety.
Cordless Lift	Lifts and lowers blinds with a light push or pull on the bottomrail. Eliminates lift cords making them safer in homes with children. Available on both slat sizes.
RemoteTilt	Battery-powered multi-channel radio frequency (RF) system tilts slats open and closed with the touch of a button. The RF remote control operates the blinds at great distance and the multi-channel version allows for independent blind operation. Combine with wall switches or timer for total convenience. Available with cordless lift and cord lift.
DESIGN OPTIONS	
Solid/Decorative Tapes	Over 20 selections to accentuate the blinds; decorative tapes are woven, not printed.
LightsOut Routeless	Slats have no route holes, which means reduced incoming light, increased privacy and better aesthetics.
2- or 3-on-1 Headrail	Two or three blinds may be combined on one long headrail for flexible light control and beautiful unity.
HARDWARE AND INSTALLATION	
Low Profile Headrail	Our slim design low profile headrail is strong enough to cover large windows with a single blind, yet slim enough to reduce stack and allow more view.
Ⓐ **Metal Components**	Cordlock, tilter and barrels inside the headrail are metal, not plastic, for better performance and longer life.
Ladders	Four strand ladders won't stretch, ensuring uniform slat alignment.
Tilter System	Wheeled cord tilter and hexagonal tilt rod enable smooth operation and tight slat closure.
Trapezoid Bottomrail	Provides contoured, modern look, improved slat tilting/rotation, and better closure.

LIMITED LIFETIME WARRANTY on all Wood Blinds by Alta ensures customer satisfaction.   CERTIFIED BEST FOR KIDS Certified Best for Kids when used with wand tilt   Ⓐ *The Alta Advantage*
