C. Expiration of Nonconforming Sign Permit

A Nonconforming Sign Permit shall expire and become void under the same circumstances as those under which any other sign permit may expire and become void.

 - 3. Where four sign faces are arranged in a square, rectangle, or diamond, the area of the sign shall be the area of the two largest faces.
 - 4. Where a sign is in the form of a three-dimensional object, the area shall be determined by drawing a square, rectangle, parallelogram, triangle, circle or semicircle, the sides of which touch the extreme points or edges of the projected image of the sign and multiplying that area by two (2). The "projected image" is that image created by tracing the largest possible two dimensional outline of the sign.

9.6.4 Number of Signs

As a minimum, the sign format shall specify the types of signs and dimensions (not to exceed the size limits contained in this Article) which will be permitted each occupant within the complex. The sign format shall also contain common design elements which lend a unified appearance to the signs of the occupants within the complex. The sign format may only be modified with the approval of the Development Regulations Administrator upon submission of a revised plan and specifications detailing the revised format.

9.7.10 Signs Required to Be Certified By A Registered Engineer
