

THE SOLAR SYSTEM ACCORDING TO PHI

PLANETARY ORBITS RELATED TO RESONANCE, SPACE AND TIME

This chart illustrates the approximate planetary orbits that constitutes the Solar System within the 3rd arm of the Milky Way Galaxy. The purpose of the illustration is to show that the planetary orbits approximate a phi ratio mathematical relationship to each other. This principle displays the marvelous intelligent design of the 'Signature of the Creator' in the Golden Mean that the whole of Creation is stamped with and it is not a random chance or coincidence. The planetary orbits are a product of resonance and frequency and even corresponds to a peculiar color and even sound. These orbits occurred at the point of Creation, based on the account of Genesis. Such present planetary orbits may not have been the original construct of the Solar System as the account of Genesis suggest a prior state of order that 'became formless and void' at some pre-historical timeframe. One such evidence is the Asteroid Belt that many purport to have been a planet of some type that suffered a collision. Some theorize that it was caused by the Sun's binary partner that is on an elliptical orbit of its own. Another clue is the Planetary Angles from the Ecliptic of Earth that seem to suggest some sort of chaos was introduced to the Solar System that disturbed the order as some orbits of planets are displaced to a certain degree.

Φ The Golden Ratio

It is the 'Signature of the Creator'. It is seen in the spirals of galaxies, in math, nature, the arts and the Human Form. It is a mathematical principle when 2 quantities are in the golden ratio if the ratio of the sum of the quantities to the larger quantity is equal to the ratio of the larger quantity to the smaller one. As it can be approximated, the dimensions of the phi ration can be ascertained in the Inner Solar System. Earth is a pivotal fulcrum from were Mars is in phi ratio to the Sun. Earth in relation to distance to Mercury is in phi ratio to the Sun as well as Earth's distances to Venus's orbit are in phi ratio with Mars. For the Outer Solar System, the fulcrum appears to be Jupiter, the King Planet that corresponds to the Center Stem or branch of the Heavenly Menorah, that of the Messiah, the Christ which is the center and fulcrum of life, time and space itself. The overall arching phi spiral from the Sun to the edge of the Solar System with Uranus demarks the limits of the Asteroid Belt and limits of the Inner Solar System. Jupiter is the focal point for the phi ratio distances to Saturn Neptune and the Asteroid Belt.

DIVINE REFLECTIONS

Out of the vast expanse of the know Universe, the Bible states that the Creator of there of chose to place and establish His Name on Earth. As of now, Earth is the only planet know to be able to sustain life as it is know on Earth. Presently, there have been numerous discoveries of planets having similar type of makeup as the Earth that could have a comparable atmosphere and water components to sustain life. As there are recognized multiplicity of dimensions known to mankind, this does not preclude life forms that are out of this world, or 'extraterrestrial' in nature to include inter-stellar and multidimensional life. The Bible validates this as for example, Angels as life-forces are beings outside the realm of space and time for example. This category of being includes what the Bible denotes as the Fallen Ones in allegiance to Lucifer that rebelled against the Creator and perhaps is the originator of the chaos seen throughout the Solar System.

For whatever reason, the Bible does state that the Earth, along with Mankind will see the culmination of Good vs. Evil of the Universe. This showdown will occur at the return of the Creator-King, Jesus Christ at the Battle of Armageddon.

OUTER SOLAR SYSTEM (Top View)

DIVINE PROPORTIONS

The 7 primary Planets of the Solar System are said to correspond to the Menorah of the Tabernacle of Moses and Temple of Solomon that in themselves are a copy of the true forms in the House of the Creator, YHWH. From Earth's perspective, the Sun and the Moon compliment and balance the Day that constituted the daylight and nighttime portions. The 7 Planets represent the arms of the Menorah that also attributes the 7 primary colors of Creation, the 7 Feasts of YHWH and the Seven Churches of Christ as depicted in the book of Revelation.

THE FIBONACCI SEQUENCE

The Sequence is based on the mathematical works of Leonard Fibonacci, who lived in the 13th century. The Fibonacci Sequence is also referred to as The Golden Ratio. This Ratio has been found to occur in many forms within nature, basically all of Creation. The Fibonacci Sequence takes the numbers derived from the Golden Ratio and ascribes them into a BINARY CODE.

This Code has many uses and has been utilized in various application in such areas and disciplines as computer programming to economic market analysis.

SIZE OF THE MILKY WAY GALAXY

The approximate size of the Solar System in comparison to the Milky Way galaxy can be compared to the entire North American continent as being the size of the galaxy. In turn the size of the Solar System would be as big as an American quarter dollar coin. Within that coin, the iris of the pupil in the head of the bust would be the Sun. The size of the eye's iris would be big enough to fit several Jupiters. This is not taking into consideration the billions of other galaxies and numerous clusters thereof.

CELESTIAL SYMBOLS

- ☉ Earth
- ☼ Sun
- ☾ Moon
- ♿ 1. Mercury
- ♊ 2. Venus
- ♈ 3. Mars
- ♉ 4. Jupiter
- ♊ 5. Saturn
- ♋ 6. Neptune
- ♌ 7. Uranus
- ♍ Pluto

North America = size of Milky Way

Solar System = size of Quarter
